The definitive chronicle of the most stunning year in the legendary career of Tiger Woods, when the world's greatest golfer returned to competitive play following major knee surgery—only to have his personal life unravel in the public spotlight at year's end. Who is the real Tiger Woods? The unbeatable, indomitable, and ultimate competitor? The husband and father who cares more about his family than anything else? Or the supremely confident controller who thought fierce management of his image and those around him would allow him to lead a double life? In *Unplayable*, veteran journalist Robert Lusetich offers an in-depth look at the world's most recognizable yet least known athlete, Tiger Woods. Lusetich, who first interviewed Woods in the late 1990s and has written about him since 1996, was the only writer to cover every PGA Tour event the world's number one golfer played in 2009. *Unplayable* tells of the unfolding of Tiger's most pivotal season on the golf course—with his first ever hiatuses from professional play—and provides extensive reporting and the backstory to show who the most elusive man in all of sports really is. Lusetich peels away the layers of the Woods persona to create a portrait that is neither unsympathetic nor hesitant to shed light on Tiger's shortcomings. This rich, insightful account reveals: what actually makes Woods the game's dominant player; how his upbringing influenced who he is today and how he has changed over time; and the nature of his relationships with his family, former and current friends, celebrity athletes, peers, coaches, sports agents, sponsors, and the media and public itself. Based on one-of-a-kind access, *Unplayable* is a gripping look at the man who changed golf and inspired more fans around the world than anyone else in the history of the sport.

Noblit and Hare propose a method - meta-ethnography - for synthesizing from qualitative, interpretive studies. They show that ethnographies themselves are interpretive acts, and demonstrate that by translating metaphors and key concepts between ethnographic studies, it is possible to develop a broader interpretive synthesis.

The Iraq Papers will be the most comprehensive and best-organized document collection of America's misadventure in Iraq. The editors have organized the book around the concept of pre-emption, a policy that represented a significant break with past American foreign policy. The editors locate the intellectual origins of pre-emption in neoconservative writings from the early 1990s, and then trace how the logic of pre-emption played out across a number of arenas in the first decade of the twenty first century: the war itself, America's relationship with its allies and the UN, its dealings with Iraqi society and successive Iraqi governments after 2003, and domestic policy in the Bush-era United States. They close with a chapter on the limits of American policy as it moves into the Obama era. There are eleven chapters in total, and ten will feature a representative selection of the most important documents relating to the origins of the war - including prominent writings by early neoconservative advocates for invasion - and the war's impact on Iraq, America, and the world. Covering more than a decade, The Iraq Papers will be a definitive source for anyone interested in understanding this enormously complicated and difficult conflict.

This book offers a comprehensive look at an industry that plays a growing role in motor vehicle production in the United States.
