In the twenty-first century, we are continually confronted with the existential side of technology—the relationships between identity and the mechanizations that have become extensions of the self. Focusing on one of humanity’s most ubiquitous machines, Automotive Prosthetic: Technological Mediation and the Car in Conceptual Art combines critical theory and new media theory to form the first philosophical analysis of the car within works of conceptual art. These works are broadly defined to encompass a wide range of creative expressions, particularly in car-based conceptual art by both older, established artists and younger, emerging artists, including Ed Ruscha, Martha Rosler, Richard Prince, Sylvie Fleury, Yael Bartana, Jeremy Deller, and Jonathan Schipper. At its core, the book offers an alternative formation of conceptual art understood according to technology, the body moving through space, and what art historian, curator, and artist Jack Burnham calls “relations.” This thought-provoking study illuminates the ways in which the automobile becomes a naturalized extension of the human body, incarnating new forms of “car art” and spurring a technological reframing of conceptual art. Steeped in a sophisticated take on the image and semiotics of the car, the chapters probe the politics of materialism as well as high/low debates about taste, culture, and art. The result is a highly innovative approach to contemporary intersections of art and technology.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

As shopping has been transformed from a chore into a major source of hedonistic pleasure, a specifically Russian consumer culture has begun to emerge that is unlike any other. This book examines the many different facets of consumption in today’s Russia, including retailing, advertising and social networking. Throughout, emphasis is placed on the inherently visual - not to say spectacular - nature both of consumption generally, and of Russian consumer culture in particular. Particular attention is paid to the ways in which brands, both Russian and foreign, construct categories of identity in order to claim legitimacy for themselves. What emerges is a fascinating picture of how consumer culture is being reinvented in Russia today, in a society which has one, nostalgic eye turned towards the past, and the other, utopian eye, set firmly on the future. Borrowing concepts from both marketing and cultural studies, the approach throughout is interdisciplinary, and will be of considerable interest, to researchers, students and practitioners wishing to gain invaluable insights into one of the most lucrative, and exciting, of today’s emerging markets.

CCH's U.S. Master Depreciation Guide offers tax and accounting professionals who work with businesses a one-stop resource for guidance in understanding and applying the complex depreciation rules to their fixed assets. This area is especially challenging, because bits and pieces of applicable information must be gathered from a maze of Revenue Procedures, IRS Tables and IRS Regulations. These sources are frequently old and include some materials which may be non-applicable. CCH's U.S. Master Depreciation Guide pulls the pieces together, so practitioners can make sense of all the corresponding information and put the information into practice.
