Downsized from her boutique firm, Erin panics as she watches her career ambitions plunge into free fall. Why else would the savvy twenty-eight-year-old take a job as...a waitress? A favorable word from a family friend gets Erin in the door at Roulette, Madison Avenue's newest exclusive haunt and home to a celebrity chef with a talent for cutting-edge cuisine and spotting the weakest link. Life behind the apron is even worse than she imagined—from mangling orders

to overimbibing at a wine seminar, Erin finds herself in hot water with the egomaniacal chef and the owner's outrageous wife. And then there's the dismissive, surly clientele, all but Daniel Fratelli, a flirtatious TV news producer. Is Daniel really as down-to-earth as he seems? Or will he eventually succumb to one of the many glamorous uptown girls in his own social circle? Determined to prove that she won't crack under pressure, Erin begins to master the art of waitressing—becoming part shrink, part slave, and part foie gras hustler. But her continuing series of disastrous missteps quickly sends her right back to the bottom of the food chain. Forced to prove her commitment by organizing the storage area and alphabetizing produce after hours, Erin wonders if she'll ever make it back to the real world. But with a little help from her quirky best friend, she comes up with an idea that might take her life in a whole new direction—and that's just the first course....

This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and

choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".
