Learn how you can use the revolutionary five-step marketing process that helped Microsoft, NBC Universal, and IBM achieve double-digit increases in sales. "When HP uses the Voice of the Customer methodology, our marketing campaign results improve dramatically: response rates improve 3X to 10x, sales increase 2x or more, and we can spend far less to get great results. When we don't use VOC, our results can suffer greatly." -Garry Dawson, Hewlett-Packard, Americas Advertising and Direct Marketing Manager "Ernan is a leading expert in creating disciplined "Voice of Customer" driven marketing processes. If you want to move from just talking about VOC to being a leader in implementing it, you must read this book." -Fred Neil, Global Head of CRM, Dell "The clearest and best book yet published on the subject of Voice of the Customer marketing principles. In this hands-on tutorial, Ernan takes you through the steps that can transform your business, putting your customers at the center of defining what is relevant and what will drive deeper engagement." -Bernd Schmitt, Professor, Columbia Business School, Author of Customer Experience Management and Big Think Strategy In Voice of the Customer Marketing, Ernan Roman, the award-winning marketing guru who created the IDM (Integrated Direct Marketing) and Opt-in marketing methodologies shows you a proven, step-by-step process for understanding the expectations of your customers and prospects for more effective relationships and deeper levels of value. He then demonstrates how to use these insights to develop high impact, high return relationship marketing strategies and action plans which generate consistent double-digit increases in response and sales. The book's numerous case studies demonstrate the most effective uses of Voice of the Customer marketing in action, and the most frequent mistakes marketers make-trying to "manage" customers rather than continually engaging them. This book is essential reading for all marketers, whether in Fortune or Growth sized companies, who want dramatic increases in sales and marketing effectiveness.

To be successful in today's marketplace, a company must integrate its traditional business functions to provide superior value to targeted customers. This means creating an offering that echoes in the customers' consciousness as a great deal for them. Why? Because the value provided serves customers best interests. In so doing, a business succeeds, attracts new customers, and is able to continually improve the value offered to existing customers. Value Based Marketing for Bottom Line Success provides a 5-step model and critical tools necessary for creating and managing a successful Value Delivery marketing strategy. Customers buy value, not product or features. They buy from the company that provides the most value. And they buy what's in their best interest. Consequently, the secret to customer retention and growing value relationships with customers is to always make it in their best interest to do business with you by providing the best value in the marketplace. Value Based Marketing for Bottom Line Success: 5 Steps to Creating Competitive Value offers a Value Creation and Delivery process which will help a company to compete profitably in its marketplace by: 1) identifying the value expectations of target customers; 2) selecting the values on which it wants to compete; 3) analyzing the ability within the organization to deliver that value; 4) communicating the value & selling the value message; 5) delivering the value promised & improving the company's value model. A value-focused strategy, by definition, isn't a mass marketing strategy; it's a targeted laser strategy directed at chosen value segments that are profitable for the supplier. This text offers a customer value creation model, which shows how to create and sustain competitive advantage while delivering customer value and offers a method for quantifying customer lifetime value (CLV), which enables a company to identify which customer value segments it should target.
