Business Communication: Made Simple, Second Edition covers business needs and the examination requirements of professional and other examining bodies relating to commerce and industry. The book starts by giving an introduction to the study of communication. The text also discusses some of the main factors that interfere with common understanding between the communicators and inhibit cooperation; the importance of effective communication; the role played by perception, attitude, and motivation in communication; and the need for previous experience or knowledge. The influence of prejudice on the presentation of facts and opinions; the three principal methods of communication; and the factors involved in creating an effective system of communication in an organization are also considered. The book tackles the lines of internal communication; the effects of authority and responsibility on communication; the various ways in which efficient external and internal communication is achieved; and the problem of staff location on communication. The text then describes the informal methods of communication; the importance of letter and report writing; the need for form design and control; as well as some aspects of written language. The importance of verbal communication and information technology are also discussed. Business executives and company and commercial accountants will find the volume invaluable.

The four volume set LNAI 3681, LNAI 3682, LNAI 3683, and LNAI 3684 constitute the refereed proceedings of the 9th International Conference on Knowledge-Based Intelligent Information and Engineering Systems, KES 2005, held in Melbourne, Australia in September 2005. The 716 revised papers presented were carefully reviewed and selected from nearly 1400 submissions. The papers present a wealth of original research results from the field of intelligent information processing in the broadest sense; topics covered in the first volume are intelligent design support systems, data engineering, knowledge engineering and ontologies, knowledge discovery and data mining, advanced network application, approaches and methods of security engineering, chance discovery, information hiding and multimedia signal processing, soft computing techniques and their applications, intelligent agent technology and applications, smart systems, knowledge - based interface systems, intelligent information processing for remote sensing, intelligent human computer interaction systems, experience management and knowledge management, network (security) real-time and fault tolerant systems, advanced network application and real-time systems, and intelligent watermarking algorithms.

In a single volume, the new edition of this guide gives comprehensive coverage of the developments within the fast-changing field of professional, academic and vocational qualifications. Fully indexed, it provides details on all university awards and over 200 career fields, their professional and accrediting bodies, levels of membership and qualifications, and is a one-stop guide for careers advisors, students and parents. It should also enable human resource managers to verify the qualifications of potential employees.

This concise and comprehensive textbook covers the complete spectrum of office procedure, including general functions and responsibilities, the engagement and management of staff, security and control, the range of services an office is expected to provide and the function of office machinery.

In 2020, COVID-19 starkly demonstrated the global interconnectedness of business, as it disrupted supply chains and manufacturing operations, broadly shuttered retail stores, and led to restrictions on movement and travel around the world. Other events in 2019 also showcased the undeniable globalization of business, be it from the (un)expected ramifications of Brexit to the impacts of data breaches across various industries. Riots in Hong Kong over an extradition bill also sparked huge debate and controversy, and the U.S.-China trade war also caused concern. All of these events may have largely and immediately impacted one region, yet effects reverberate across larger swathes of the globe—ultimately affecting vast areas, industries, and sectors across the international landscape. Issues in Global Business explores all of these and more, across a wide range of topics, including the on-demand economy, global manufacturing, Bitcoin, data security, and many more. Coupled with a comprehensive overview of the business landscape around the world by Dr. Mamoun Benmamoun, an assistant professor at the Boeing Institute of International Business at Saint Louis University, this book provides students with the essential information they need to assess business practices through an international lens.

This book provides a comprehensive introduction to business organisation and administration. Written in a straightforward, readable style this textbook covers all the major aspects of the subject. Starting with the organisational background it goes on to cover the functions of the important departments within the firm, the role of the administrative officer, and other areas of knowledge vital to the smooth running of a business. There are self-assessment questions at the end of each section, past exam questions, study and exam tips and a full index.
