The murders were carried out in pogroms and mass shootings; by a policy of extermination through work in concentration ...

With the benefit of never-before-published eyewitness accounts from Holocaust survivors, a professor at the University of Munich follows the fate of the Jews who survived the Holocaust and remained in Germany immediately following World War II. UP.

Stories of real people who had been put in concentration camps during the war.

In this touching account, veteran New York Times reporter Joseph Berger describes how his own family of Polish Jews -- with one son born at the close of World War II and the other in a "displaced persons" camp outside Berlin -- managed against all odds to make a life for themselves in the utterly foreign landscape of post-World War II America. Paying eloquent homage to his parents' extraordinary courage, luck, and hard work while illuminating as never before the experience of 140,000 refugees who came to the United States between 1947 and 1953, Joseph Berger has captured a defining moment in history in a riveting and deeply personal chronicle.

This book deals with the integration of thousands of survivors of the Holocaust into Israeli society in the early years of the new State's existence. Among the issues discussed are: the ways in which the survivors were recruited into the defence forces and the role they played in the War of Independence, the settlement of the immigrants in towns and villages abandoned by Arabs during the war and the immigrant youth.

For the last decade scholars have been questioning the idea that the Holocaust was not talked about in any way until well into the 1970s. After the Holocaust: Challenging the Myth of Silence is the first collection of authoritative, original scholarship to expose a serious misreading of the past on which, controversially, the claims for a ‘Holocaust industry’ rest. Taking an international approach this bold new book exposes the myth and opens the way for a sweeping reassessment of Jewish life in the postwar era, a life lived in the pervasive, shared awareness that Jews had narrowly survived a catastrophe that had engulfed humanity as a whole but claimed two-thirds of their number. The chapters include: an overview of the efforts by survivor historians and memoir writers to inform the world of the catastrophe that had befallen the Jews of Europe an evaluation of the work of survivor-historians and memoir writers new light on the Jewish historical commissions and the Jewish documentation centres studies of David Boder, a Russian born psychologist who recorded searing interviews with survivors, and the work of philosophers, social thinkers and theologians theatrical productions by survivors and the first films on the theme made in Hollywood how the Holoocaust had an impact on the everyday life of Jews in the USA and a discussion of the different types, and meanings, of ‘silence’. A breakthrough volume in the debate about the ‘Myth of Silence’, this is a must for all students of Holocaust and genocide.

Publisher Description
The Holocaust marks a decisive moment in modern suffering in which it becomes almost impossible to find meaning or redemption in the experience. In this study, C. Fred Alford offers a new and thoughtful examination of the experience of suffering. Moving from the Book of Job, an account of meaningful suffering in a God-drenched world, to the work of Primo Levi, who attempted to find meaning in the Holocaust through absolute clarity of insight, he concludes that neither strategy works well in today's world. More effective are the day-to-day coping practices of some survivors. Drawing on testimonies of survivors from the Fortunoff Video Archives, Alford also applies the work of Julia Kristeva and the psychoanalyst Donald Winnicot to his examination of a topic that has been and continues to be central to human experience.
One summer's night in 1946, over 1,000 European Jews waited silently on an Italian beach to board a secret ship. They had survived Auschwitz, hidden and fought in forests and endured death marches--now they were taking on the Royal Navy, running the British blockade of Palestine. From Eastern Europe to Israel via Germany and Italy, Rosie Whitehouse follows in the footsteps of those secret passengers, uncovering their extraordinary stories--some told for the first time. Who were those people on the beach? Where and what had they come from, and how had they survived? Why, after being liberated, did so many Jews still feel unsafe in Europe? How do we--and don't we--remember the Holocaust today? This remarkable, important book digs deep and travels far in search of answers.
