A history of the most profitable company in the world, Saudi Aramco, and the story behind the family that ruthlessly maneuvered to control this multi-trillion dollar enterprise. The Saudi royal family and Aramco leadership are, and almost always have been, motivated by ambitions of long-term strength and profit. They use Islamic law, traditional ideology, and harsh justice to maintain stability and their own power, but underneath the thobes and abayas and behind the religious fanaticism and illiberalism lies a most sophisticated and ruthless business enterprise. Today, that corporation is poised to pull off the biggest IPO in history. Over more than a century, fed by ambition and oil wealth, al Saud, as the royal family is known, has come from next to nothing to rule as absolute monarchs, a contrast with the world around them and modernity itself. The story starts with Saudi Arabia's founder, Abdul Aziz, a lowly refugee embarking on a daring gambit to reconquer his family's ancestral home?the mud-walled city of Riyadh. It takes readers almost to present day, when the multinational family business has made al Saud the wealthiest family in the world and on the cusp of a new transformation. Now al Saud and its family business, Aramco, are embarking on their most ambitious move: taking the company public and preparing the country for the next generation.

Tallinn Manual 2.0 expands on the highly influential first edition by extending its coverage of the international law governing cyber operations to peacetime legal regimes. The product of a three-year follow-on project by a new group of twenty renowned international law experts, it addresses such topics as sovereignty, state responsibility, human rights, and the law of air, space, and the sea. Tallinn Manual 2.0 identifies 154 'black letter' rules governing cyber operations and provides extensive commentary on each rule. Although Tallinn Manual 2.0 represents the views of the experts in their personal capacity, the project benefitted from the unofficial input of many states and over fifty peer reviewers.

Written more than 50 years ago, this detailed account serves as a kind of time capsule and features the author's prescient insights into the cultural and technological consequences of King Ibn Saud's deliberate decision to choose America as his commercial ally.
