This IBM® Redbooks® publication is focused on melding industry preferred practices with the unique needs of the IBM i community and providing a holistic view of modernization. This book covers key trends for application structure, user interface, data access, and the database. Modernization is a broad term when applied to applications. It is more than a single event. It is a sequence of actions. But even more, it is a process of rethinking how to approach the creation and maintenance of applications. There are tangible deliveries when it comes to modernization, the most notable being a modern user interface (UI), such as a web browser or being able to access applications from a mobile device. The UI, however, is only the beginning. There are many more aspects to modernization. Using modern tools and methodologies can significantly improve productivity and reduce long-term cost while positioning applications for the next decade. It is time to put the past away. Tools and methodologies have undergone significant transformation, improving functionality, usability, and productivity. This is true of the plethora of IBM tools and the wealth of tools available from many Independent Solution Providers (ISVs). This publication is the result of work that was done by IBM, industry experts, and by representatives from many of the ISV Tool Providers. Some of their tools are referenced in the book. In addition to reviewing technologies based on context, there is an explanation of why modernization is important and a description of the business benefits of investing in modernization. This critical information is key for line-of-business executives who want to understand the benefits of a modernization project. This book is appropriate for CIOs, architects, developers, and business leaders. Related information Making the Case for Modernization, IBM Systems Magazine

"Keep It Simple Selling" is all about shortcuts! Let's make selling cars easier. . . Let's make selling trucks faster. . . And for heaven's sake, let's make it fun! Imagine for a moment how it would feel if you could sell cars just by being yourself and finding ways to serve others naturally and easily. How would your life be different if sales opportunities continuously dropped out of the sky and into your lap, with no stress or struggle? Would you like to sell 80 percent of the people you talk to every day? The automotive business is a gold mine. Not just for a few natural salespeople---for anyone. In this industry, anyone can advance as far as they want. There's no barrier to entry, and there's no glass ceiling. Your raise becomes effective when you do. Damian Boudreaux started out cleaning parts in his friend's transmission shop. From there, he tried and stumbled and tried again to sell more cars than the month before. It wasn't until he began to open his eyes and pay attention to the people around him that he understood what it really takes to succeed in the automotive business. The lessons he learned during his journey to becoming a consistently top-selling salesman are humbling and inspiring at the same time.
