Atlas is a large metropolitan city in the Kingdom of Atlas, sitting atop a floating island above the city of Mantle. The city is extremely advanced, with towers and skyscrapers of all sizes being visible at a distance, all seemingly with a blue color scheme to them. Atlas is seen as having platforms on the underside of the floating island and Atlas Academy is situated at the center of the city.

The book discusses the concept of the smart city, and is based on a multi-service and multi-sectoral approach to urban planning, including various urban functions and the human capital of cities. The work is divided into three parts. The first is an introductory section which covers definitions, policies and tools used at European level for the development and classification of a smart city. The second presents a selection of examples of Western and Eastern communities, which experienced technologies and strategies that have made them smart. The third describes in detail the main three possible approaches (economical, technological and social) to the smart city concept which are the focus ambits of the holistic concept of smart city. The work provides a good overview of the concept of smart city, and also offers a critical analysis of the various approaches to smart cities, in order to provide tools to develop solutions that address the smart development of cities with an approach as multi-sectoral as possible. Its accessible language and several examples make the book easy to read and appealing to public administrators, students, planners and researchers.
