Case method teaching immerses students in realistic business situations--which include incomplete information, time constraints, and conflicting goals. The class discussion inherent in case teaching is well known for stimulating the

File Type PDF Auditing Cases An Interactive

development of students' critical thinking skills, yet instructors often need guidance on managing that class discussion to maximize learning.

Teaching with Cases focuses on practical advice for instructors that can be easily implemented. It covers how to plan a course, how to teach it,

File Type PDF Auditing Cases An Interactive

Learning Approach 5th Edition Solutions
and how to evaluate it. The book is organized by the three elements required for a great case-based course: 1) advance planning by the instructor, including implementation of a student contract; 2) how to make leading a vibrant case discussion easier and more systematic; and 3)

File Type PDF Auditing Cases An Interactive

learning for student evaluation after the course is complete. Teaching with Cases is ideal for anyone interested in case teaching, whether basing an entire course on cases, using cases as a supplement, or simply using discussion facilitation techniques. To learn more about the book, and to see
