functional assessment, and a dedicated MERLIN which provides the student and instructor with additional up-to-date tools and resources to enhance and expand their content knowledge. Highlights fundamental aging theories to provide a basis for biological and psychosocial aspects of quality nursing care. Provides complete and comprehensive coverage of assessment recapping normal, deviations from normal and abnormal findings. Uses a 5-step nursing process format to provide the consistent framework for presentation of nursing care. Features care plans with clinical situations for those disorders most prevalent in the elderly. Includes a separate chapter on cultural influences and integrates cultural awareness boxes throughout to focus on specific customs related to how a nurse might care for the aging client. Includes separate chapters focusing on acute, home and long term care to provide a complete discussion of care in each of these settings. Provides detailed coverage of pain, infection, cancer, chronic illness, loss, death and dying, and substance abuse to explain potentially complex aspects of aging and the related care. Provides a consistent chapter pedagogy including learning objectives, summary, key points, and critical thinking exercises. Includes Client/Family teaching boxes that emphasize key aspects of practice and teaching for self-care. Highlights Home Care Tips Boxes to promote practical, effective care for the home-bound older client.

Essentials of Gerontological Nursing presents the best practices needed to care for older adults. Its brief, yet comprehensive, grasp of issues in elder care is a refreshing addition to the current literature, which is more commonly focused on theory than on clinical practice. Designed primarily for students in gerontological nursing courses in BSN and graduate programs, the book provides: Essential clinical information and "best practices" needed to care for older adults Current research and new patient approaches in gerontological nursing Overviews of rarely discussed issues, such as elder abuse, cultural considerations, and restraint alternatives Clinical specifications and practical applications Content designed to fit into a one-semester course Essentials of Gerontological Nursing is everything the nursing student needs to know when caring for older adults.

GERONTOLOGICAL NURSING, 3/e is a comprehensive, research-based, and

## Read PDF Basic Geriatric Nursing

up-to-date guide to nursing care for older adults in all settings. It brings together essential information about normal and pathological changes associated with aging; healthy aging; common diseases of aging; and key psychosocial, cultural, and public health issues. Reflecting today's emphasis on evidence-based practice and appropriate delivery of scarce healthcare resources, this text presents new best practices and QSEN standards throughout, promoting more effective assessment, diagnosis, planning, and outcome evaluation. The text's multidisciplinary approaches help nurses "add life to years," not just extend life. Its coverage of acute and chronic diseases includes nursing implications, atypical presentation, functional implications, pharmacology, evaluation, etiology, risk factors, and complications; the text also includes a full chapter on multisystem diseases. This book supports safe, effective, and appropriate practice in the home, hospitals, long-term care, and hospice settings.

Provide compassionate, professional nursing care for older adults! Designed for LPN/LVNs, *Basic Geriatric Nursing, 8th Edition* offers a practical introduction to concepts of aging and the physiologic and psychosocial changes that affect the elderly adult. Clear guidelines help you master basic skills such as health assessment, nursing
