This book is a collection of insights from experts of various fields, and will entail discussions of the recurring haze problem in Southeast Asia. It discusses multiple aspects of the haze problem. What is the cause of the haze? Who are the perpetrators and victims? What are the impacts and costs of the haze? Why has the haze problem persisted for decades? Are there prospects of resolving the pollution? How should we analyze the issue? Which solutions are more or less effective than others? How can we involve the stakeholders? The book provides a wide range of views on the haze problem. Written in a simple and accessible manner, this book allows the readers to easily access across different fields and develop a deeper understanding of the haze.

This book gathers the latest advances, innovations, and applications in the field of machine science and mechanical engineering, as presented by international researchers and engineers at the 11th International Conference on Machine and Industrial Design in Mechanical Engineering (KOD), held in Novi Sad, Serbia on June 10-12, 2021. It covers topics such as mechanical and graphical engineering, industrial design and shaping, product development and management,

complexity, and system design. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations.

With dozens of rare color maps and other documents, *Early Mapping of Southeast Asia* follows the story of map-making, exploration and colonization in Asia from the 16th to the 19th centuries. It documents the idea of Southeast Asia as a geographical and cosmological construct, from the earliest of times up until the dawn of the modern era. Using maps, itineraries, sailing instructions, traveler's tales, religious texts and other contemporary sources, it examines the representation of Southeast Asia, both from the historical perspective of Western exploration and cartography, and also through the eyes of Asian neighbors. Southeast Asia has always occupied a special place in the imaginations of East and West. This book recounts the fascinating story of how Southeast Asia was, quite literally, put on the map, both in cartographic terms and as a literary and imaginative concept.

Remote sensing has majorly profited almost all areas of human activity and development. Remote sensing provides a common platform to

physical, natural and social activities for interaction and advancement. This book discusses the impacts of remote sensing on various areas of science, human activity and technology by presenting a selected number of high quality contributions related to various remote sensing applications organized under two sections: Land Cover and Climate & Atmosphere. The book includes contributions of prominent experts and researchers, who possess vast knowledge and years of experience in this field.

How do Islamic courts work? What sorts of cultural understandings inform judicial process and litigants' strategies? How do women's claims fare? Do these courts promote social tolerance? And how do states use them to consolidate power, build nations, and shape a modern citizenry? These are among the questions addressed in this book, which not only enhances our understanding of diversity among and within the world's Muslim communities, but also provides ethnographic, historical, and transnational perspectives on contemporary Islam in the shifting landscape of a strategically important region of the world. Focusing on Malaysia, which has sustained more rapid development than probably any other Muslim nation, Michael Peletz explores the culture, political economy, and history of Islamic courts. He

demonstrates that they are centrally involved in the creation and policing of new Malay-Muslim identities (such as middle-class urban dwellers) that the state sees as the basis for a national polity that will be highly competitive. He also shows how and why Islamic courts are key sites in struggles involving ethnic and religious groups, social classes, political parties, and others with a major stake in defining Islam's role with respect to the maintenance of sovereignty and the achievement of modernity and civil society in an age of globalization. Peletz deepens our knowledge of Islamic political development in a country very much concerned with forging an Islamic modernity viewed by its leaders as a viable alternative to Western-style modernization.
