Preliminaries in construction - Designing Buildings Wiki - Share your construction industry knowledge. Preliminaries (or 'prelims') may appear in tender documents, providing a description of a project that allows the contractor to assess costs which, whilst they do not form a part of any of the package of works required by the contract, are required by the method and circumstances of the works.

PRELIMINARIES 1.1 DCU2 Existing services Attend to existing services as follows: - If the service is to be continued, repair, divert or relocate as required. - If the service is to be abandoned, cut and seal or disconnect, and make safe.

introduction to understanding the costs encountered on a building project together with an appreciation of the many factors influencing them.

Topics discussed include the structure and magnitude of the construction industry, responsibilities and roles of the organisations and people within the industry.

Offers quantity surveyors, engineers, building surveyors and contractors clear guidance on how to recognise and avoid measurement risk. The book recognises the interrelationship of measurement with complex contractual issues; emphasises the role of measurement in the entirety of the contracting process; and helps to widen the accessibility of measurement beyond the province of the professional quantity surveyor. For the busy practitioner, the book includes: Detailed coverage of NRM1 and NRM2, CESMM4, Manual of Contract Documents for Highway Works and POM(I) Comparison of NRM2 with SMM7 Detailed analysis of changes from CESMM3 to CESMM4 Coverage of the measurement implications of major main and sub-contract conditions (JCT, NEC3, Infrastructure Conditions and FIDIC) Definitions of 5D BIM and exploration of BIM measurement protocols Considerations of the measurement risk implications of both formal and informal tender documentation and common methods of procurement An identification of pre- and post-contract measurement risk issues Coverage of measurement risk in claims and final accounts Detailed worked examples and explanations of computer-based measurement using a variety of industry-standard software packages.

On the occasion of his 75th birthday, Neil Kaplan's unparalleled influence in the field of international arbitration is celebrated in this book which comprises contributions from over twenty-five renowned international arbitration practitioners, all of whom credit Kaplan as having impacted the development of arbitration in their respective jurisdictions or professionally. The book is constructed as a three-part compendium as follows: • the Kaplan Lectures, an annual series established to bring some of the best minds in international arbitration to Hong Kong to address current and practical issues; • key decisions and arbitration awards rendered by Kaplan, with commentaries that make current the issues arising out of these judgments and also provide an in-depth analysis of important issues emanating from his treaty arbitration awards; • articles showcasing the reach of Kaplan's influence through reflections by several of his former assistants who are now making a mark in their own right in the international arbitration community. Arbitration practitioners will welcome this book for its practical analysis of some of the most discussed and debated 'hot issues' in arbitration law and practice today. In addition, the commentaries on Kaplan's key decisions offer especially insightful guidance for practitioners, academics and students in the field of international arbitration.

UK construction shows its underlying strength. Tender prices have risen strongly since last year's book was compiled -- increasing by around 8%, and at an annualised rate of close to 10% in the last half year. Spon's Architects' and Builders' Price Book 2017, compiled by AECOM, still provides the most accurate, detailed and professionally relevant construction price information for the UK. Its unique Tender Index, updated through the year, gives an ongoing reality check and allows you to adjust for changing market conditions. Although it suits a wide range of project sizes, this is the only price book which sets out a detailed cost base for contracts exceeding £4,000,000 in value. Use the access code inside the front cover of the book to get set up with internet access to this 2017 edition until the end of December 2017. We now provide a VitalSource® ebook, giving a versatile and powerful online data viewing package. Major changes have been made to this 142nd edition: Major revision and simplification has been made to the in situ concrete section, and plasterboard linings and partitions sections have been heavily revised and developed. New Cost Models are included: a laboratory, a car park and an updated London Office. More plant prices have been separated out in the measured works section. As well as an overhaul of prices, several new items have been added, including: Foamglas insulation Carlite waterproof concrete and an expanded range of stone flooring ... along with the standard features you have come to expect from Spon's A&B: 20,000 prices for the most frequently specified items, the majority with labour constants and detailed build-ups. Hundreds of alternative materials prices for the more unusual items. Detailed guidance on wage rates, daywork, cost limits and allowances, property insurance and professional fees, plus useful formulae, design criteria and trade association addresses. Updated, free of charge, two or three times a year – see inside for registration details. Updates are available online at www.pricebooks.co.uk

This book provides a detailed guide to the principles and practice of construction contracts. It is written for both students and professionals working in all branches of surveying and construction. Based around the JCT 05 Standard Building Contracts, it has been fully revised and updated to reflect the latest versions of these contracts. The book sets out clearly what should be done at each stage of the construction contract process. Each step is illustrated with examples of good practice making clear the role and responsibilities of the surveyor and how responsibilities are best delivered. This fourth edition of Contract Practice for Surveyors builds on the book's reputation for clarity and simplicity to provide the most accessible and useful introductory guide to construction contracts available today.

Construction prices rose over the last year by 5%, according to AECOM's tender price index, with construction price inflation continuing to run above the long-run average. The main drivers are rising input costs. Producer price indices have moved up at a clip in recent quarters, with sharp increases in prices for materials and fuels consumed by UK manufacturers. Demand- and supply-side factors make the probability of short-term price falls very slim. SPON'S ARCHITECTS' AND BUILDERS' PRICE BOOK 2018, compiled by AECOM, still provides the most accurate, detailed and professionally relevant construction price information for the UK. Its unique Tender Index, updated through the year, gives an ongoing reality check and allows you to adjust for changing market conditions. Although it suits a wide range of project sizes, this is the only price book which sets out a detailed cost base for contracts exceeding £4,000,000 in value. Use the access code inside the front cover of the book to get set up with a VitalSource® ebook of this 2018 edition. This versatile and powerful online data viewing package is available for use until the end of December 2018. Major changes have been made to this 143rd edition: New Cost Models for a retail distribution unit, a palliative care unit, and a cinema As well as an overhaul of prices, several new items have been added, including: An expanded range of beam & block flooring Rainwater harvesting – with a precast concrete tank A precast concrete flow attenuation system Precast concrete communication boxes ... along with the standard features you have come to expect from SPON'S ARCHITECTS' AND BUILDERS' PRICE BOOK: 20,000 prices for the most frequently specified items, the majority with labour constants and detailed build-ups. Hundreds of alternative materials
