approximately 25 percent of total U.S. energy consumption and about 60 percent of U.S. petroleum consumption. Practically all of this energy is in the form of petroleum products with very minor amounts of electric energy and natural gas. Thus, the transportation sector is very important in analyses of energy demand and the potential for energy conservation.

"It is common for grammars to include an introductory chapter

that offers a general introduction to the language under investigation as well as its users. We encourage the grammar writer to include this type of information for the sign language to be described. If a certain variant of the sign language is described, this should be made clear at the outset. The structure of this part is fairly flexible. As can be seen from the table of contents, we suggest including information about (i) the history of the sign language, (ii) characteristics of the Deaf community, (iii) the status of the sign language, and (iv) previous linguistic work on the sign language. The last section in particular will have an impact on the content of subsequent parts,

as we encourage the grammar writer to include findings from previous studies in the grammatical description of the sign language. Clearly, alternative structures are possible. The overview of previous linguistic work, for instance, could be provided under the "History" header, and Deaf culture and/or Deaf education could be discussed under dedicated first-level headers - to give just two examples. Also, depending on the available information, sub-headers could be added. Note that we adopt the convention of writing Deaf with a capital D when it refers to issues related to a community that is characterized by the use of a sign language. In contrast, deaf with a small d

refers to the medical condition of not being able to hear. It is up to the grammar writer to decide whether to stick to this convention in the grammar"--

Now considered a dysfunctional mess, Chicago's public housing projects once had long waiting lists of would-be residents hoping to leave the slums behind. So what went wrong? To answer this complicated question, D. Bradford Hunt traces public housing's history in Chicago from its New Deal roots through current mayor Richard M. Daley's Plan for Transformation. In the process, he chronicles the Chicago Housing Authority's own transformation from the city's most progressive government

agency to its largest slumlord. Challenging explanations that attribute the projects' decline primarily to racial discrimination and real estate interests, Hunt argues that well-intentioned but misguided policy decisions—ranging from design choices to maintenance contracts—also paved the road to failure. Moreover, administrators who fully understood the potential drawbacks did not try to halt such deeply flawed projects as Cabrini-Green and the Robert Taylor Homes. These massive high-rise complexes housed unprecedented numbers of children but relatively few adults, engendering disorder that pushed out the working class and, consequently, the rents needed

to maintain the buildings. The resulting combination of fiscal crisis, managerial incompetence, and social unrest plunged the CHA into a quagmire from which it is still struggling to emerge. Blueprint for Disaster, then, is an urgent reminder of the havoc poorly conceived policy can wreak on our most vulnerable citizens.
