"Ren van Landsberg stood alone on the deck of the steamer ...there could be no turning back to Europe now. This was Java--the end of his journey--and he was a little frightened at all that the suave, exotic name implied." In search of his future, a young Dutchman travels south of the equator to join his older brother supervising a sugar plantation on Java, circa 1900. From the day he arrives, he struggles to adapt to social, cultural and sexual mores that are alien, even contradictory, to all his previous life experiences. Despite having a "girl back home", Ren soon encounters several young ladies of both his own race and Javanese. There, the complexities begin, not the least of which is Grandmother Dassam..."I have three packages," her whining voice went on to the girl. "This one," holding up a small package, "will kill a healthy person in one hour... This second one will kill more slowly--about a month--and this one will take several years, but he'll suffer much and die in the end." When in Java, expect the unexpected. *** Born in Holland in 1879, author Baron Schwartzberg also worked on Java as a young man. Three decades later he was driven to enlist journalist Mary Bennett Harrison to help him tell this story. How many vignettes, characters or women he drew from actual experiences is unknown. But as you'll discover, this highly credible colonial romance rings true. After a 90 year hiatus, literary archaeologist Kent Davis revives the Baron's 1931 novel as an expanded modern edition with nearly 300 period photos showing Javanese people and places featured in the text. Plus appendices with publisher's notes; author bios; Davis' article

"Javanese Women in Photos: Emerging Technologies and World Views"; excerpts from the 1912 travel guide, Isles of the East, and the 1929 book Malay Poisons and Charm Cures; a glossary of Indonesian terms; and regional maps.

He only wanted to build a plaything - a small, simple device born of innate curiosity and a fascination of things mechanical. Scavenging parts and repurposing components, a country gunsmith assembles what is supposed to be a conversation piece – a trinket to show his friends... a toy really... a small rail gun. The invention is so much more. After nearly destroying his West Texas shop, Dusty realizes he has stumbled upon science that could alter the future of mankind. The size and shape of a common rifle, his device is capable of producing unimaginable energy. The simple, gentleman rancher is faced with a dilemma of the ages, the survival of the human race. The resulting technology can produce limitless, clean energy, or if used as a weapon, inconceivable destruction. Nothing so monumental stays secret for long. Powerful men and desperate governments learn of the discovery, and it quickly becomes evident that whoever wields the rail gun can dominate the entire planet. Book One of a new series, The Olympus Device by author Joe Nobody takes the reader through a fast paced adventure that explores the dichotomy of corruptive power versus ultimate benefit.

Brief history of Hereford cattle: v. 1, p. 359-375.

It was already dusk. The last train towards East Java was ready to depart. The station master was holding a sign of departure and the departure warning was sounding. A young soldier in his uniform was ready to depart. He had a backpack and rifle on his back and a pistol at his waist. He was standing on the platform with a girl. They gazed at each other; neither of them could break away. Putting both his arms on her shoulders, he looked deep into her eyes. His gaze penetrated her heart deeply. At that moment, the girl felt and knew that she would not see him again. This was a farewell. He would never come back.

Darynda Jones, author of The New York Times bestselling series that began with First Grave on the Right, brings us Death and the Girl Next Door, a thrilling Young Adult novel garnering high praise and early buzz from major authors Ten years ago, Lorelei's parents disappeared without a trace. Raised by her grandparents and leaning on the support of her best friends, Lorelei is finally beginning to accept the fact that her parents are never coming home. For Lorelei, life goes on. High school is not quite as painful as she thinks it will be, and things are as normal as they can be. Until the day the school's designated loner, Cameron Lusk, begins to stalk her, turning up where she least expects it, standing outside her house in the dark, night after night. Things get even more complicated when a new guy—terrifying, tough, sexy Jared Kovach—comes to school. Cameron and Jared instantly despise each other and Lorelei seems to be the reason for their animosity. What does

Jared know about her parents? Why does Cameron tell Jared he can't have Lorelei? And what will any of them do when Death comes knocking for real? Thrilling, sassy, sexy, and inventive, Darynda Jones's first foray into the world of teens will leave readers eager for the next installment. "Unique, witty, and touching—I LOVED THIS BOOK!" —P.C. Cast, New York Times bestselling author of The House of Night Series

Some volumes also include extra numbers.

Learn programming in Java from scratch - and keep on learning! The new edition of this excellent primer teaches how to program in an object-oriented style. Objects come first providing a framework for understanding how Java programs work and how they can be designed, in an organised and systematic way. Programming is taught with a view to quality software engineering and is anchored in real world issues, particularly testing. Examples and exercises provide motivation. Self- tests and class project suggestions enhance this comprehensive study package. The purpose of this book is to take readers from the basic principles of object-oriented design and programming using Java through to class library construction and application development. New to this edition: JDK 2 compliant Part 1 - objects and object oriented programming concepts have been made more student friendly with a lot of additional small scale examples to aid understanding Part 2 - Language Reference now appears at the back of the book so as not to interrupt the flow The new JFC (including Swing and the container classes) replaces obsolescent AWT Go to the support website at: <http://www.dcs.kcl.ac.uk/DevJavaSoft/> to find: More exercises Selected solutions Instructor's notes and resources Code for case studies Updates, revisions and bug fixes Reviews and feedback
