In this compelling collection of first-person stories, adults who have made outstanding achievements in adult literacy were paired with writers to tell of their transition to reading. These are people who have had the courage to overcome the barrier of words to break into a broader sense of themselves, to feel more empowered in the world. Courageous, too, is the very sharing of these stories, in which private moments are opened wide with the hope that others will take the same steps. Whether confronting undiagnosed dyslexia, a Canadian Tire store manager to ensure Christmas for a child, written tests for the military, certification exams, or jumping from an airplane, these people are heroes.

How do children learn their first words? The field of language development has been polarized by responses to this question. Explanations range from accounts that emphasize the importance of cognitive heuristics in language acquisition, to those that highlight the role of "dumb attentional mechanisms" in word learning. This monograph offers an alternative to these accounts. A hybrid view of word-learning, called the emergentist coalition theory, combines cognitive constraints, social-pragmatic factors, and global attentional mechanisms to arrive at a balanced account of how children construct principles of word learning. In twelve experiments, with children ranging from 12 to 25 months of age, data are described that support the emergentist coalition theory.

A company ' s worst enemy isn ' t always the competition. Sometimes it ' s the fear that lives within its own walls. This fear can take many forms: fear of not meeting a goal, of not getting a bonus, of losing decision rights and respect. Fear compels employees and managers to protect themselves by creating seemingly impenetrable barriers fortified by rules and practices that benefit one group while harming others. Left unchecked, fear-driven barriers can spread at an alarming rate in a company. Workgroups define success not by reaching the company ' s overall goal, but by fulfilling their part of the process. Restrictive policies pile up until managers start to exert extreme control over headcount and resources. Other managers feel compelled to build empires -- taking over other departments ' functions to regain or enhance their self-sufficiency. In the midst of these counterproductive activities, employees suffer, success deteriorates, and efficiency dies. While these barriers might seem insurmountable, they aren ' t. They were built internally, and they can be destroyed internally. By learning from the real-world lessons in this book, leaders, managers, and employees can overcome barriers that plague their company. It takes courageous leadership, and it can be difficult, but the result will be nothing less than transformational.
