Married to the boss? For two years Amy Taylor had managed to keep her sexy boss at arm's length. But one emotionally charged morning in the office had irrevocably changed all that. Seeing Jake Carter, determined bachelor, with his sister's baby tucked comfortably into the crook of his arm, Amy's barriers had suddenly come tumbling down. So what if matters did get briefly—and wildly—out of hand between them? It was business as usual now. Until Amy realized that marriage could now be on the agenda as her boss was about to become the father of her child!

Read Online Brush Prismic A30 Manual

This publication describes the theory and philosophy of military planning as practiced by the U.S. Marine Corps. The intent is to describe how we can prepare effectively for future action when the future is uncertain and unpredictable. In so doing, this publication provides all Marines a conceptual framework for planning in peace, in crisis, or in war. This approach to planning is based on our common understanding of the nature of war and on our warfighting philosophy of maneuver warfare as described in Marine Corps Doctrinal Publication (MCDP) 1, Warfighting.

This classic text offers you the key to understanding short circuits, open conductors and other problems relating to electric power systems that are subject to unbalanced

conditions. Using the method of symmetrical components, acknowledged expert Paul M. Anderson provides comprehensive guidance for both finding solutions for faulted power systems and maintaining protective system applications. You'll learn to solve advanced problems, while gaining a thorough background in elementary configurations. Features you'll put to immediate use:

- Numerous examples and problems
- Clear, concise notation
- Analytical simplifications
- Matrix methods applicable to digital computer technology
- Extensive appendices

Power System Stability and Control contains the hands-on

information you need to understand, model, analyze, and solve problems using the latest technical tools. You'll learn about the structure of modern power systems, the different levels of control, and the nature of stability problems you face in your day-to-day work.

This book forms the Proceedings of an RILEM workshop in Barcelona in November 1994. It is structured as a series of presentations/reviews by some of the leading international researchers and technical experts of the concrete world. Coverage ranges from developments in materials science, through performance and behaviour of concrete, to manufacturing and construction.
