The Roadmap series works as a year-long companion to earning higher grades, as well as passing the high-stakes 6th Grade Math Ohio Proficiency Test that is necessary for grade level promotion. This book has been designed according to the specific standards set forth by the state of Ohio. Now parents can work with their kids to both improve their grades and pass these important tests. The experts at The Princeton Review have analyzed the OPT, and this book provides the most up-to-date, thoroughly researched practice possible. TPR breaks the test down into individual skills and provides lessons modeled after the OPT to familiarize students with the test's structure, while increasing their overall skill level. The Princeton Review knows what it takes to succeed in the classroom and on tests. This book includes strategies that are proven to raise student performance. TPR provides:

- Content review, detailed lessons, and practice exercises modeled after the actual exam
- Test-taking skills and math essentials such as reading charts and graphs, using fractions and decimals, and understanding basic geometry
- 2 complete practice OPTs

The children at Napville Elementary School always ignore Officer Buckle's safety tips, until a police dog named Gloria accompanies him when he gives his safety speeches.

Considered by many to be mentally retarded, a brilliant, impatient fifth-grader with cerebral palsy discovers a technological device that will allow her to speak for the first time.

The international best-seller that makes mathematics a thrilling exploration. In twelve dreams, Robert, a boy who hates math, meets a Number Devil, who leads him to discover the amazing world of numbers: infinite numbers, prime numbers, Fibonacci numbers, numbers that magically appear in triangles, and numbers that expand without . As we dream with him, we are taken further and further into mathematical theory, where ideas eventually take flight, until everyone—from those who fumble over fractions to those who solve complex equations in their heads—winds up marveling at what numbers can do. Hans Magnus Enzensberger is a true polymath, the kind of superb intellectual who loves thinking and marshals all of his charm and wit to share his passions with the world. In *The Number Devil*, he brings together the surreal logic of *Alice in Wonderland* and the existential geometry of *Flatland* with the kind of math everyone would love, if only they had a number devil to teach it to them.

The extraordinary #1 New York Times bestseller about the ability of books to feed the soul even in the darkest of times. Nominated as one of America's best-loved novels by PBS's *The Great American Read*. When Death has a story to tell, you listen. It is 1939. Nazi Germany. The country is holding its breath. Death has never been busier, and will become busier still. Liesel Meminger is a foster girl living outside of Munich, who scratches out a meager existence for herself by stealing when she encounters something she can't resist—books. With the help of her accordion-playing foster father, she learns to read and shares her stolen books with her neighbors during bombing raids as well as with the Jewish man hidden in her basement. In superbly crafted writing that burns with intensity, award-winning author Markus Zusak, author of *I Am the Messenger*, has given us one of the most enduring stories of our time. “The kind of book that can be life-changing.” —The New York Times “Deserves a place on the same shelf with *The Diary of a Young Girl* by Anne Frank.” —USA Today **DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF.**

Correlated to the New York and Common Core State Standards! Buckle Down has just what you need to stay in step with the Common Core State Standards—a groundbreaking change in our educational system. The new Buckle Down to the Common Core will ensure that every classroom is current, focused, and on

track with the CCSS initiative! Lessons introduce key skills and use examples to walk students through the math concepts, step by step. You'll get both targeted review and extensive practice on open-ended questions.

With the help of Spectrum Data Analysis and Probability for grades 6 to 8, children develop problem-solving math skills they can build on. This standards-based workbook focuses on middle school concepts like operations, ratios, probability, graph interpretation, and more. Middle school is known for its challenges—let Spectrum ease some stress. Developed by education experts, the Spectrum Middle School Math series strengthens the important home-to-school connection and prepares children for math success. Filled with easy instructions and rigorous practice, Spectrum Data Analysis and Probability helps children soar in a standards-based classroom!

“Reminiscent of Toni Morrison’s *The Bluest Eye*.” —The New York Times “One of the best books I have ever read... will live in the hearts of readers for the rest of their lives.” —Colby Sharp, founder of Nerdy Book Club “An emotional, painful, yet still hopeful adolescent journey... one that needed telling.” —Kirkus Reviews (starred review) “I really loved this.” —Sharon M. Draper, author of the New York Times bestseller *Out of My Mind* This deeply sensitive and “compelling” (BCCB) debut novel tells the story of a thirteen-year-old who must overcome internalized racism and a verbally abusive family to finally learn to love herself. There are ninety-six reasons why thirteen-year-old Genesis dislikes herself. She knows the exact number because she keeps a list: -Because her family is always being put out of their house. -Because her dad has a gambling problem. And maybe a drinking problem too. -Because Genesis knows this is all her fault. -Because she wasn’t born looking like Mama. -Because she is too black. Genesis is determined to fix her family, and she’s willing to try anything to do so... even if it means harming herself in the process. But when Genesis starts to find a thing or two she actually likes about herself, she discovers that changing her own attitude is the first step in helping change others.

Wow! This is a powerful book that addresses a long-standing elephant in the mathematics room. Many people learning math ask “Why is math so hard for me while everyone else understands it?” and “Am I good enough to succeed in math?” In answering these questions the book shares personal stories from many now-accomplished mathematicians affirming that “You are not alone; math is hard for everyone” and “Yes; you are good enough.” Along the way the book addresses other issues such as biases and prejudices that mathematicians encounter, and it provides inspiration and emotional support for mathematicians ranging from the experienced professor to the struggling mathematics student. --Michael Dorff, MAA President This book is a remarkable collection of personal reflections on what it means to be, and to become, a mathematician. Each story reveals a unique and refreshing understanding of the barriers erected by our cultural focus on “math is hard.” Indeed, mathematics is hard, and so are many other things--as Stephen Kennedy points out in his cogent introduction. This collection of essays offers inspiration to students of mathematics and to mathematicians at every career stage. --Jill Pipher, AMS President This book is published in cooperation with the Mathematical Association of America.
