**Built to Last - Wikipedia**  
Built to Last is a very well researched and a convincing book that has definitely opened my mind to new ideas and thoughts about companies. Every chapter of the book is important. The authors have evidently shown visionary and comparison companies to show how the same idea may not still work if you don't have certain characteristics. The best and maybe the most scariest part is that there is ...

"This is not a book about charismatic visionary leaders. It is not about visionary product concepts or visionary products or visionary market insights. Nor is it about just having a corporate vision. This is a book about something far more important, enduring, and substantial. This is a book about visionary companies." So write Jim Collins and Jerry Porras in this groundbreaking book that shatters myths, provides new insights, and gives practical guidance to those who would like to build landmark companies that stand the test of time. Drawing upon a six-year research project at the Stanford University Graduate School of Business, Collins and Porras took eighteen truly exceptional and long-lasting companies -- they have an average age of nearly one hundred years and have outperformed the general stock market by a factor of fifteen since 1926 -- and studied each company in direct comparison to one of its top competitors. They examined the companies from their very beginnings to the present day -- as start-ups, as midsize companies, and as large corporations. Throughout, the authors asked: "What makes the truly exceptional companies different from other companies?" What separates General Electric, 3M, Merck, Wal-Mart, Hewlett-Packard, Walt Disney, and Philip Morris from their rivals? How, for example, did Procter & Gamble, which began life substantially behind rival Colgate, eventually prevail as the premier institution in its industry? How was Motorola able to move from a humble battery repair business into integrated circuits and cellular communications, while Zenith never became dominant in anything other than TVs? How did Boeing unseat McDonnell Douglas as the world's best commercial aircraft company -- what did Boeing have that McDonnell Douglas lacked? By answering such questions, Collins and Porras go beyond the incessant barrage of management buzzwords and fads of the day to discover timeless qualities that have consistently distinguished out-standing companies. They also provide inspiration to all executives and entrepreneurs by destroying the false but widely accepted idea that only charismatic visionary leaders can build visionary companies. Filled with hundreds of specific examples and organized into a coherent framework of practical concepts that can be applied by managers and entrepreneurs at all levels, Built to Last provides a master blueprint for building organizations that will prosper long into the twenty-first century and beyond.

Two hundred remarkable people are included, notably: -Jeff Bezos, founder and CEO, Amazon.com -Warren Buffett -Bill Clinton -Frances Hesselbein, former CEO, Girl Scouts of America -Maya Angelou -Bill Gates Each shares how he or she harvested victories, learned from failures, and found the courage to be true to their passions. By following a set of simple principles culled from these inspiring interviews, readers can transform their business and personal lives, and discover the true meaning of success.

"Ashley and Dino bring light and hope for relationships in this beautiful book. Explore Designed to Last with open eyes and an open heart, and discover how to find joy in the in-between." -Liz Marie Galvan, bestselling author of Cozy White Cottage and LizMarieBlog Design a life intentionally. Grow faithfully. Create something beautiful that will last! Over half a million readers have joined the journey of Instagram sensations Ashley and Dino Petrone. Through their popular online community Arrows and Bow, Ashley and Dino share their adventures, mishaps, and joys of building a life together using an unexpected element: design. Now, in their much-anticipated debut book, Ashley and Dino invite readers into their home and relationship through their trademark honest and hilarious storytelling. They share both never-before-revealed and fan-favorite stories, including getting engaged after only three weeks! why they chose to wait until their wedding night moving into an RV with three kids (and they're still speaking to each other!) the unexpected, painful circumstances that led them to find deeper hope turning Ashley's creative hobby into a thriving business . . . and so much more! Ashley and Dino are the first to say they don't have all the answers, but they welcome you to join them as they share the struggles and successes that come from intentionally staying committed to god and each other. Because when you build with faith, creativity, and love as the foundation . . . you build something designed to last. Includes exclusive photos and bonus DIY decorating tips!

Built to Last is not an introduction to network marketing. It's the missing piece for many would-be top network marketing professionals. The super successful build with the mindset of a CEO while everyone else builds with the mindset of an employee. If you are willing to do the work, Built to Last provides a step-by-step guide to becoming a leader who achieves enormous success in your network marketing business. In this book you will learn: The mindset and philosophy of top network marketers How to identify and push past your limiting beliefs How to lead yourself so you can lead others How to attract leaders into your business How to mentor and develop leaders How to push those you're mentoring past their limiting beliefs How to create financial and time freedom How to earn a 6- or 7-figure income year after year Following the detailed guidance Keith Callahan offers in Built to Last, he went from bankruptcy to 7-figure success in his network marketing business. During nearly a decade in the industry, he has mentored many people on his team of 30,000 distributors to 6- and 7-figure success. With Keith Callahan's book, you can build a network marketing team that allows you to help the most people and earn the highest, long-term, stable income. The end goal is a business that thrives for years to come and does so - here's the important part - with or without you.

The thirty-two century-old hotels featured in this book have defied the passage of time for a variety of reasons, many explicable, some beyond explanation, all miraculous. For eighteen of them, it was the fortuitous creation of the New York City Landmark Preservation Commission in 1965. The landmarks law was enacted in response to the demolition of the iconic Pennsylvania Station in 1963. After 139 years, the following evaluation is still true: "New York is the paradise of hotels. In no other city do they flourish in such numbers, and nowhere else do they attain such a degree of excellence. The hotels of New York naturally take the lead of all others in America, and are regarded by all who have visited them as models of their kind." James D. McCabe, Jr. Lights and Shadows of New York, 1872

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the verybeginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

From Jim Collins, the most influential business thinker of our era, comes an ambitious upgrade of his classic, Beyond Entrepreneurship, that includes all-new findings and world-changing insights. What's the roadmap to create a company that not only survives its infancy but thrives, changing the world for decades to come? Nine years before the publication of his epochal bestseller Good to Great, Jim Collins and his mentor, Bill Lazier, answered this question in their bestselling book, Beyond Entrepreneurship. Beyond Entrepreneurship left a definitive mark on the business community, influencing the young pioneers who were, at that time, creating the technology revolution that was birthing in Silicon Valley. Decades later, successive generations of entrepreneurs still turn to the strategies outlined in Beyond Entrepreneurship to answer the most pressing business questions. BE 2.0 is a new and improved version of the book that Jim Collins and Bill Lazier wrote years ago. In BE 2.0, Jim Collins honors his mentor, Bill Lazier, who passed away in 2005, and reexamines the original text of Beyond Entrepreneurship with his 2020 perspective. The book includes the original text of Beyond Entrepreneurship, as well as four new chapters and fifteen new essays. BE 2.0 pulls together the key concepts across Collins' thirty years of research into one integrated framework called The Map. The result is a singular reading experience, which presents a unified vision of company creation that will fascinate not only Jim's millions of dedicated readers worldwide, but also introduce a new generation to his remarkable work.

A companion guidebook to the number-one bestselling Good to Great, focused on implementation of the flywheel concept, one of Jim Collins' most memorable ideas that has been used across industries and the social sectors, and with startups. The key to business success is not a single innovation or one plan. It is the act of turning the flywheel, slowly gaining momentum and eventually reaching a breakthrough. Building upon the flywheel concept introduced in his groundbreaking classic Good to Great, Jim Collins teaches readers how to create their own flywheel, how to accelerate the flywheel's momentum, and how to stay on the flywheel in shifting markets and during times of turbulence. Combining research from his Good to Great labs and case studies from organizations like Amazon, Vanguard, and the Cleveland Clinic which have turned their flywheels with outstanding results, Collins demonstrates that successful organizations can disrupt the world around them--and reach unprecedented success--by employing the flywheel concept.
