DEPARTMENT 6 - Vol. 1 Una notte di passione, un ti amo caduto nel vuoto... Tra Rachel Jessop e Nate Ferrentino, agenti dell'organizzazione di sicurezza Department 6, c'è un muro di disagio eretto dopo un episodio del passato. Questa barriera invisibile dev'essere abbattuta per forza quando ai due viene affidata una missione delicata: fingersi sposati per infiltrarsi in una setta di fanatici e assicurare alla giustizia Ethan Wycliff, che si fa chiamare il Santo, ma si comporta come un demonio. Nel torrido deserto dell'Arizona, fra oscuri segreti, riti scabrosi, misteriose scomparse, divampa nuovamente la passione fra Rachel e Nate. Ma quando il Santo mette gli occhi su Rachel, la situazione si complica... Bisogna fermare Ethan prima che altre persone muoiano, e la prossima vittima potrebbe essere proprio lei, Rachel.

This book explores the problem-oriented interdisciplinary research movement comprised of Critical Discourse Analysis (CDA) and Critical Discourse Studies (CDS) for scholars, teachers, and students from many backgrounds. Beginning with a Preface by renowned CDA/CDS scholar Ruth Wodak, it introduces CDA/CDS through examples of what its research looks like, delineates various precursors to CDA/CDS and important foundational concepts and theories, and traces its development from its early years until it became established. After the relationship between CDA and CDS is discussed, seven commonly cited approaches to CDA/CDS are outlined, including their connections and differences, their origins and development, major and associated scholars, research focus(es), and central concepts and distinguishing features. After a summary of critiques of CDA/CDS and responses by CDA/CDS scholars, the book provides an overview of its salient connections to other interdisciplinary areas of scholarship such as critical applied linguistics, education, anthropology/ ethnography, sociolinguistics, gender studies, queer linguistics, pragmatics and ecolinguistics. The final chapter describes how scholars use their knowledge of CDA/CDS to make a difference in the world.

“An exciting, intriguing read.”—First for Women Magazine The bodies

of seven women have been discovered in Skull Valley, Arizona. Jonah Young, a private security operative from Department 6, has been hired by the Yavapai County sheriff to assist in solving these murders. But Jonah's not prepared for the complications that arise when he's forced to work with a woman from his past, private investigator Francesca Moretti. Jonah betrayed Francesca ten years ago. She hasn't forgiven him and she's pretty sure she never will. But the woman she was hired to find has been murdered in exactly the same way as the seven in Skull Valley, so, Francesca has to work with Jonah. They quickly zero in on the most likely suspect—but questions remain. Questions they have to answer. Because if they bet on the wrong man, it might be the last thing they ever do... Originally published in 2010

For more than a year, Sebastian Costas has been trying to unravel the truth behind the murder of his ex-wife and son. Despite overwhelming evidence to the contrary, he's convinced that her second husband—a cop—committed both murders, then faked his own death. Now Sebastian has followed the slimmest of leads to Sacramento...and that's where he finally gets the break he needs. Jane Burke, an investigator with The Last Stand, calls him in connection with a separate crime—a crime that could lead him straight to the man he's been looking for. Once

married to a serial killer, Jane has spent the past five years rebuilding her life. And with Sebastian she finally has a chance at happiness. But the man they're after is after them, too. For him this has become a personal battle, one he's determined to win. Whatever it takes...

New York Times bestseller Brenda Novak's Evelyn Talbot series returns, with a heavily pregnant Evelyn being held hostage. With Jasper Moore, the privileged boy who attacked her when she was only sixteen, finally caught and in prison, Dr. Evelyn Talbot, founder and head psychiatrist at Hanover House (a prison/research facility for psychopaths in remote Alaska), believes she can finally quit looking over her shoulder. She's safe, happier than she's ever been and expecting her first child. She's also planning to marry Amarok, her Alaska State Trooper love interest and the town's only police presence. But before the wedding can take place, a psychopath from the much more recent past comes out of nowhere and kidnaps her in broad daylight. Instead of planning her wedding, Evelyn finds herself doing everything she can to survive, save her baby and devise some way to escape while Amarok races the clock to find her - before it's too late.

Obsession leads to lies... When air force captain Luke Trussell opens his door one Sunday morning, he's shocked to find the police—and even more shocked when they charge him with rape. He knows he made a mistake in judgment the night before, but he certainly didn't force his attentions on the woman who's been stalking him for months. Problem is...Karina Harter has the bruises—and the DNA evidence—to make her claim convincing. And lies can lead to murder. Determined to isolate Luke, Karina goes to victims' rights advocate Ava Bixby of The Last Stand, hoping Ava will help put Luke behind bars. But Ava soon realizes she's defending the wrong victim. Problem is...switching her support to Luke could be dangerous—especially when she falls for him. Because Karina won't tolerate losing the man she wants to anyone. Least of all Ava...

This book fully integrates the conventional and biotechnological approaches to fruit crop breeding. Individual chapters are written on a wide variety of species covering all the major fruit crops in one volume. For each crop, there is a discussion of their taxonomy and evolution, history of improvement, crossing techniques, evaluation methods, and heritability of major traits and germplasm resources. Also discussed are the most recent advances in genetic mapping and QTL (quantitative trait loci) analysis, marker assisted breeding,

gene cloning, gene expression analysis, regeneration and transformation. Patenting and licensing issues are also covered.

With a clear comparative approach, this volume brings together for the first time contributions that cover different periods of the history of ancient pharmacology, from Greek, Byzantine, and Syriac medicine to the Rabbinic-Talmudic medical discourses. This collection opens up new synchronic and diachronic perspectives in the study of the ancient traditions of recipe-books and medical collections. Besides the highly influential Galenic tradition, the contributions will focus on less studied Byzantine and Syriac sources as well as on the Talmudic tradition, which has never been systematically investigated in relation to medicine. This inquiry will highlight the overwhelming mass of information about drugs and remedies, which accumulated over the centuries and was disseminated in a variety of texts belonging to distinct cultural milieus. Through a close analysis of some relevant case studies, this volume will trace some paths of this transmission and transformation of pharmacological knowledge across cultural and linguistic boundaries, by pointing to the variety of disciplines and areas of expertise involved in the process.

Many of our current agricultural crops are natural or agricultural hybrids (between two or more species), or polyploids (containing more than one genome or set of chromosomes). These include potato, oats, cotton, oilseed rape, wheat, strawberries, kiwifruit, banana, seedless watermelon, triticale and many others. Polyploidy and hybridization can also be used for crop improvement: for example, to introgress disease resistance from wild species into crops, to produce seedless fruits for human consumption, or even to create entirely new crop types. Some crop genera have hundreds of years of interspecific hybridization and ploidy manipulation behind them, while in other genera use of these evolutionary processes for crop improvement is still at the theoretical stage. This book brings together stories and examples by expert researchers and breeders working in diverse crop genera, and details how polyploidy and hybridization processes have shaped our current crops, how these processes have been utilized for crop improvement in the past, and how polyploidy and interspecific hybridization can be used for crop improvement in the future.
