Casarett and Doull's has set the standard for toxicology reference texts for years, and is the market leading title to this day. It serves the general toxicology market, and is to the field what Goodman and Gilman is to pharmacology. The books are often purchased together, and form a knock-out punch along with our DiPiro textbook; combined, these three titles produce millions of dollars in revenue and more than 100,000 in unit sales. Casarett & Doull's is, in other words, one part of a triad that forms the best pharmacology/pharmacy/toxicology collection in all of medical publishing

Written by two experienced toxicology lecturers, Principles of Toxicology provides a broad-based yet in-depth introduction to this diverse subject. Comprehensive and easy-to-read, the book covers this broad and interdisciplinary field from the viewpoint of three different functional levels: molecular and cellular; physiological; and ecological and environmental. This revised second edition expands the coverage of the book while keeping the organizational format that made the first edition a bestseller. It also includes a series of brief case studies illustrating the application of toxicological principles to current issues of interest. Each and every chapter has been revised, several have been significantly rewritten, and three are entirely new. This new edition retains the extensive cross-referencing system that links all sections and enhances the integration of material. It also includes an appendix of selected toxicants that describes chemical structure and category of use. These features combine to make finding specific information quick and easy. The highly readable format and uniform, consistent presentation of information will make this the most used reference on your shelf. See what's new in the second edition!
