Corporate Finance, by Ross, Westerfield, and Jaffe emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The well-respected author team is known for their clear, accessible presentation of material that makes this text an excellent teaching tool. The ninth edition has been fully updated to reflect the recent financial crisis and is now accompanied by Connect, an exciting new homework management system.

musicologists' account of church music in post-Restoration and early Georgian England has been substantially incomplete due to an almost exclusive preoccupation with the music and musicians of the Chapel Royal. The balance is now being redressed and this book begins the task of filling one of the remaining gaps in our understanding of the field. The volume represents a detailed examination of the practical workings of a choral foundation during the later 17th and early 18th centuries, placing the musicians within their wider historical and social contexts, and based on a comprehensive survey of extant archival material.
