Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff Bry, Faye Jones

With limited authority over state lawmaking, but ultimate responsibility for the performance of government, how effective are governors in moving their programs through the legislature? This book advances a new theory about what makes chief executives most successful and explores this theory through original data. Thad Kousser and Justin H. Phillips argue that negotiations over the budget, on the one hand, and policy bills on the other are driven by fundamentally different dynamics. They capture these dynamics in models informed by interviews with gubernatorial advisors, cabinet members, press secretaries and governors themselves. Through a series of novel empirical analyses and rich case studies, the authors demonstrate that governors can be powerful actors in the lawmaking process, but that what they're bargaining over – the budget or policy – shapes both how they play the game and how often they can win it.

This introductory text is designed for applied research methods courses focused on human development. Accessible and clearly written, the text reflects an interdisciplinary, life-span approach as well as a complete balance between experimental and non-experimental methods.

Most health professionals would agree that time and funds are in short supply, even under optimal conditions. Patients, too, would admit similar shortfalls, even with optimal motivation. This book offers self-administered and easily administered interventions designed to promote positive health behaviors while requiring little or no outside funding. Editor Luciano L'Abate continues his long tradition of prolific innovations by identifying major changes in today's health care systems and explaining how targeted, prescriptive promotion/prevention strategies can enhance traditional primary, secondary, and tertiary interventions in key behavioral and relational areas.

For almost a century, big-time college athletics has been a wildly popular but consistently problematic part of American higher education. The challenges it poses to traditional academic values have been recognized from the start, but they have grown more ominous in recent decades, as cable television has become ubiquitous, commercial opportunities have proliferated, and athletic budgets have ballooned. In the second edition of his influential book Big-Time Sports in American Universities, Clotfelter continues to examine the role of athletics in American universities, building on his argument that commercial sports have become a core function of the universities that engage in them. Drawing on recent scandals on large-scale college campuses and updates on several high-profile court cases, Clotfelter brings clear economic analysis to the variety of problems that sports raise for university and public policy, providing the basis for the continuation of constructive conversations about the value of big-time sports in higher education.

This Book portrays God's calling of an Afro-American lad from the segregated Southern USA, in 1957, and elevated him and his wife, Dorothy, to become two of the most outstanding Black Pioneer Missionaries in World Missions, today! They have evangelized and planted churches in over 95 countries, and even more extensively, in the 23 countries where Christians in Action Missions has ministries. You will experience glimpses of fifty years of the Taylor's life and ministry, beginning with Elgin's call to missions in 1957, while in the USMarines. It Moves to their service as the First Black Missionaries to Japan, 1959-64; Elgin Pastored, studied Japanese, and attended The University of Maryland, earned his BA degree, and later earned his MTh in California. Dorothy, a high school teacher, taught at Okinawa Christian School and ran the youth ministry. They transferred to Nigeria, Africa, but due to a civil war, were evacuated to London, England, where they founded a Bible College, an Evangelical Church, and directed CinA's Europe, Africa, and India Ministries for 15 years. Returning to America, 1980, they worked at the US Center for World Missions, Pasadena, CA with Dr Ralph Winters. In 1982, Elgin was elected CEO of CinA Missions International, (the only known Afro-American Director of a multi-ethnic, international, cross cultural ministry during this time). The book closes, with the spotlight on their present involvement in Ghana, West Africa, where they lead medical/outreach teams, build churches and schools, bore fresh water wells, and hold leadership seminars. They were appointed Chief and Queen Mother in the Broang Ahafo Region by the King, Ohmahene Okatakayie Kodom IV, in 2001. Today, they are blessed with much remaining fruit, in both the low places of the streets, to the palaces of Kings, to God be the Glory!

Demographers and public health specialists have been surprised by the rapid increases in life expectancy, especially at the oldest ages, that have occurred since the early 1960s. Some scientists are calling into question the idea of a fixed upper limit for the human life span. There is new evidence about the genetic bases for both humans and other species. There are also new theories and models of the role of mutations accumulating over the life span and the possible evolutionary advantages of survival after the reproductive years. This volume deals with such diverse topics as the role of the elderly in other species and among human societies past and present, the contribution of evolutionary theory to our understanding of human longevity and intergenerational transfers, mathematical models for survival, and the potential for collecting genetic material in household surveys. It will be particularly valuable for promoting communication between the social and life sciences.

For undergraduate social science majors. A textbook on the interpretation and use of research. Annotation copyright Book News, Inc. Portland, Or.

Research on small groups is highly diverse because investigators who study such groups vary in their disciplinary identifications, theoretical interests, and methodological preferences. The goal of this volume is to capture that diversity, and thereby convey the breadth and excitement of small group research by acquainting students with work on five fundamental aspects of groups. The volume also includes an introductory chapter by the editors which provides an overview of the history of and current state-of-the-art in the field. Together with introductions to each section, discussion questions and suggestions for further reading, make the volume ideal reading for senior undergraduate and graduate students interested in group dynamics.
