This book is a collection of selected papers presented at the International Public Procurement Conference, October 21-23, 2004, in Fort Lauderdale, Florida, USA. Organized by the Public Procurement Research Center, the Conference was sponsored by the following organizations: Curtin University of Technology Business School (Australia); Florida Association of Public Purchasing Officers; FAU College of Architecture and Urban and Public Affairs; The National Institute of Governmental Purchasing, Inc.; South East Florida Local NIGP Chapter, United Nations Inter-Agency of Procurement Services Office; U.S. General Services Administration; and The World Bank. The book will be a great contribution to public procurement knowledge and practices. Practitioners and academic from various cultural, social, economic and political environments and various organizations share their procurement knowledge and experiences. In our current e-world, the readers of this book should not be surprised to see public procurement practitioners in different countries have experienced similar challenges; and researchers have conducted their research on similar procurement issues.

In many countries and sectors, public procurement is developing from a functional orientation to an effective socio-economic policy lever. There is a great interest among managers and academics to learn from other countries' and other sectors' change initiatives and how they dealt with the challenges they encountered. This text provides such learning opportunities, presenting case studies of public procurement, covering diverse nations, sectors and issues. The cases are combined with editorial commentary and contextualizing chapters to assist the student reader in understanding this complex topic. The text combines descriptions of cases of public procurement with cross case analysis to draw out the key dimensions to enable further examination of the central themes. Each case study concludes with three questions to aid its use as a teaching and training text. Edited by a team of internationally recognised experts in the field this innovative text illustrates the strategies and innovations within public procurement on a global scale and highlights common problems that all countries encounter. Public Procurement is vital reading for anyone with an interest in this topical area.

Public procurement affects a substantial share of world trade flows, amounting to 1000 billion euros per year. In the EU, the public purchase of works, goods and services has been estimated to account on average for 16 percent of GDP. The novelty of this book is that it focuses on the new European Union Directives approved in 2014 by the EU Parliament. The book consists of original contributions related to four specific themes of interest to the procurers' day-to-day role in modern public purchasing organizations – both economists and lawyers – allowing for relevant exchanges of views and "real time" interaction. The four sections which characterize the book are Life-cycle Costing in Public Procurement; Calculating Costs and Savings of Public Procurement; Corruption and Probity in Public Procurement and Public Procurement and International Trade Agreements: CETA, TTIP and beyond. These themes have been chosen for their current relevance in relation to the new European Public Procurement Directives and beyond. The original format features, as is the case with the first three volumes, an introductory exchange between leading academics and practitioners, from differing disciplines. It offers a series of sequential interactions between economists, lawyers and technical experts who supplement one another, so as to enrich the liveliness of the debate and improve the mutual understanding between the various professions. This essential guide will be of interest to policymakers, academics, students and researchers, as well as practitioners working in the field of EU public procurement.

This book consists of original contributions related to specific themes of interest to the procurer's day to day role in modern public purchasing organizations from both economists and lawyers, allowing for relevant exchanges of views and real time interaction.

Three international leaders in public procurement law fully explain how the procurement award process must be managed to achieve its goals in global market economy.

This publication presents the latest innovations and achievements of academic communities on Decision Support Systems (DSS). These advances include theory systems, computer-aided methods, algorithms, techniques and applications related to supporting decision making. The aim is to develop approaches for applying information systems technology to increase the effectiveness of decision making in situations where the computer system can support and enhance human judgements in the performance of tasks that have elements which cannot be specified in advance. Also it is intended to improve ways of synthesizing and applying relevant work from resource disciplines to practical implementation of systems that enhance decision support capability. The resource disciplines include: information technology, artificial intelligence, cognitive psychology, decision theory, organizational theory, operations research and modeling. Researchers come from the Operational Research area but also from Decision Theory, Multicriteria Decision Making methodologies, Fuzzy sets and modeling tools. Based on the introduction of Information and Communication Technologies in organizations, the decisional process is evolving from a mono actor to a multi actor situation in which cooperation is a way to make the decision.

Using a comparative framework, this volume presents case studies of issues of public procurement and discusses how procurement professionals and policy makers in different regions are responding to these challenges. This book discusses current issues in public procurement. Over the past few decades, public procurement has had to evolve conceptually and organizationally in the face of unrelenting budget constraints, government downsizing, public demand for increased transparency in public procurement, as well as greater concerns about efficiency, fairness and equity. Procurement professionals have also had to deal with a changeable climate produced by emerging technology, environmental concerns, and ongoing tension between complex regional trade agreements and national socioeconomic goals. The first section discusses innovation and reforms in public procurement and how practitioners are adapting to and making use of new technologies. The second section addresses the challenges of maintaining transparency, equity, and fairness in public procurement. The final section discusses preferential public procurement and introduces strategies for building sustainable public procurement systems. By combining theory and analysis with evidence from the real world, this book is of equal use to academics, policy makers, and procurement professionals.

Das Buch bietet einen breiten Überblick über best practices und lessons learned im öffentlichen Auftragsvergaberecht und deren Reform in Entwicklungsländern. Das Werk richtet sich vor allem an Studenten, Wissenschaftler und Experten, die sich über das öffentliche Auftragswesen und insbesondere Recht und Reform auf diesem Gebiet informieren möchten. Aber auch Praktiker, die für die erfolgreiche Umsetzung des Rechts verantwortlich sind und alle an Reformprozessen des öffentlichen Auftragsvergaberechts Beteiligten können von der Lektüre profitieren. Neben einer umfassenden Analyse der wichtigsten internationalen und ausgewählter nationaler Auftragsvergaberechtsinstrumenten - darunter das GPA, das UNCITRAL Modellgesetz und das Südafrikanische System - liefert die Fallstudie Namibia nützliche Einblicke in rechtliche aber auch praktische Probleme bei der Einführung und Durchsetzung des öffentlichen Auftragsvergaberechts in Entwicklungsländern.

Innovation in public procurement is essential for sustainable and inclusive growth in an increasingly globalized economy. To achieve that potential, both the promises and the perils of innovation must be investigated, including the risks and opportunities of joint procurement across borders in the European Union and the United States. This in-depth research investigates innovation in public procurement from three different perspectives. First, leading academics and practitioners assess the purchase of innovation, with a particular focus on urban public contracting in smart cities involving meta-infrastructures, public-private partnership arrangements and smart contracts. A second line of inquiry looks for ways to encourage innovative suppliers. Here, the collected authors draw on emerging lessons from the US and Europe, to explore both the costs and the benefits of spurring innovation through procurement. A third perspective looks to various innovations in the procurement process itself, with a focus on the effects of joint and cross-border procurement in the EU and US landscapes. The chapters review new technologies and platforms, the increasingly automated means of selecting suppliers, and the related efficiencies that "big data" can bring to public procurement. Expanding on research in the editors' prior volume, Integrity and Efficiency in Sustainable Public Contracts: Balancing Corruption Concerns in Public Procurement Internationally (Bryllant 2014), this volume builds on a series of academic conferences and exchanges to address these issues from sophisticated academic, institutional and practical perspectives, and to point the way to future research on the contractual models that are emerging from new procurement technologies.

Institutional reforms and their contribution to development and growth have been a source of renewed interest as well as of many challenges over the last two decades. Identifying the forces that push towards reform and the conditions that determine the success or failure of reforms, building organizational arrangements needed to make modifications to the rules of the game sustainable, and understanding the limits to the transfer of reforms and to the help that international organizations and foreign institutions can provide to support change, raise intellectually difficult and politically highly sensitive issues. This book attempts to address these issues from an economic perspective. Combining knowledge and field experience, it develops an analysis of institutional changes and organizational transformations based on the experience of the public procurement reforms carried out in sub-Saharan Africa. This highlights the economic significance of procurement and the formidable obstacles that institutional changes face. Using an original dataset, it explores the gap between the expectations and what has been achieved. It develops a framework that intends to capture the complex interaction between the different components of reform and aims to provide useful insights for researchers and policy makers.
