The period from the late tenth to the early fourteenth centuries was one of the most dynamic in European history. Latin Christendom found a new confidence which has left its mark upon the landscape in the form of the great cathedrals and castles, while thousands of new towns and villages were founded. The continent was carved up into dynastic kingdoms and principalities from which the European state system would evolve. An age of great religious enthusiasm, it developed a darkerside in the form of the Crusades and the persecution of heretics and Jews.In this book seven experts in the field examine how Europe was transformed in the Central Middle Ages. Thematic chapters analyse the political, social, economic, religious and intellectual history of Latin Christendom, and trace its expansion to the north, south and east. As well as many familiar topics the authors discuss less well known aspects of the period such as the popular experience of religion or the new kingdoms of east-central Europe. The book includes a chronology ofdevelopments, a glossary, maps, illustrations and guidance for further reading.

The Roman empire tends to be seen as a whole whereas the early middle ages tends to be seen as a collection of regional histories, roughly corresponding to the land-areas of modern nation states. As a result, early medieval history is much more fragmented, and there have been few convincing syntheses of socio-economic change in the post-Roman world since the 1930s. In recent decades, the rise of early medieval archaeology has also transformed our source-base, but this has not been adequately integrated into analyses of documentary history in almost any country. In Framing the Early Middle Ages Chris Wickham combines documentary and archaeological evidence to create a comparative history of the period 400-800. His analysis embraces each of the regions of the late Roman and immediately post-Roman world, from Denmark to Egypt. The book concentrates on classic socio-economic themes, state finance, the wealth and identity of the aristocracy, estate management, peasant society, rural settlement, cities, and exchange. These give only a partial picture of the period, but they frame and explain other developments. Earlier syntheses have taken the development of a single region as 'typical', with divergent developments presented as exceptions. This book takes all different developments as typical, and aims to construct a synthesis based on a better understanding of difference and the reasons for it.

This book challenges the common belief that race and racisms are phenomena that began only in the modern era.

A " marvelous history " \* of medieval Europe, from the bubonic plague and the Papal Schism to the Hundred Years ' War, by the Pulitzer Prize-winning author of The Guns of August \*Lawrence Wright, author of The End of October, in The Wall Street Journal The fourteenth century reflects two contradictory images: on the one hand, a glittering age of crusades, cathedrals, and chivalry; on the other, a world plunged into chaos and spiritual agony. In this revelatory work, Barbara W. Tuchman examines not only the great rhythms of history but the grain and texture of domestic life: what childhood was like; what marriage meant; how money, taxes, and war dominated the lives of serf, noble, and clergy alike. Granting her subjects their loyalties, treacheries, and guilty passions, Tuchman re-creates the lives of proud cardinals, university scholars, grocers and clerks, saints and mystics, lawyers and mercenaries, and, dominating all, the knight—in all his valor and " furious follies," a " terrible worm in an iron cocoon." Praise for A Distant Mirror " Beautifully written, careful and thorough in its scholarship . . . What Ms. Tuchman does superbly is to tell how it was. . . . No one has ever done this better. " —The New York Review of Books " A beautiful, extraordinary book . . . Tuchman at the top of her powers . . . She has done nothing finer. " —The Wall Street Journal " Wise, witty, and wonderful . . . a great book, in a great historical tradition. " —Commentary

This book offers an overview of the current state of research and a basic route map for navigating an abundant historiography available in 10 different languages. The book is also an invitation to comparison between various parts of the region over the same period.

A comprehensive, innovative study of how medieval people envisioned heaven, hell, and purgatory - images and imaginings that endure today.

This interdisciplinary volume sets out to illuminate medieval thought, and to consider how the underlying values of the Middle Ages exerted significant influence in medieval society in the West. The book situates the Christian Church in the West as a framing ideology of the Middle Ages, and considers ideology from four angles: as a means of defining power; as a way of managing power; ideology as an influence on daily living

and societies; and the ways in which ideology associated with the Middle Ages continues to influence understandings of past and present. A focus on southern European case studies has been chosen as a means of enriching and complicating study of the Middle Ages.
