Globalisation and Historiography of National Leaders: Symbolic Representations in School Textbooks, the 18th book in the 24-volume book series Globalisation, Comparative Education and Policy Research, explores the interrelationship between ideology, national identity, national history and historical heroes, setting it in a global context. Based on this focus, the chapters represent hand-picked scholarly research on major discourses in the field of history textbooks and symbolic representations of national heroes, and draw upon recent studies in the areas of globalisation, history textbooks, and national leaders. A number of researchers have written on the importance of teaching national history in order to foster national identity and a sense of belonging to a certain society, state, and people among the younger generation. Some nations prefer to create national heroes out of their political leaders who are still in power, and whose lives and reputation are portrayed as being eminently spotless.

Using diverse comparative education paradigms from critical theory, social semiotics, and historical-comparative research, the authors analyse the unpacking of the ideological agenda hidden behind the choice and lionization (or silencing) of the preferred national heroes. They provide an informed critique of various historical narratives depicting national leaders and national heroes. The book provides an easily accessible, practical yet scholarly source of information on international concerns in the field of globalisation, history education and policy research. Offering an essential sourcebook of ideas for researchers, history educators, practitioners and policymakers in the fields of globalisation and history education, it also provides a timely overview of current changes in politically correct history education narratives in history textbooks.

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

After decades of conservative dominance, the election of Barack Obama may signal the beginning of a new progressive era. But what exactly is progressivism? What role has it played in the political, social, and economic history of America? This very timely Very Short Introduction offers an engaging overview of progressivism in America--its origins, guiding

principles, major leaders and major accomplishments. A many-sided reform movement that lasted from the late 1890s until the early 1920s, progressivism emerged as a response to the excesses of the Gilded Age, an era that plunged working Americans into poverty while a new class of ostentatious millionaires built huge mansions and flaunted their wealth. As capitalism ran unchecked and more and more economic power was concentrated in fewer and fewer hands, a sense of social crisis was pervasive. Progressive national leaders like William Jennings Bryan, Theodore Roosevelt, Robert M. La Follette, and Woodrow Wilson, as well as muckraking journalists like Lincoln Steffens and Ida Tarbell, and social workers like Jane Addams and Lillian Wald answered the growing call for change. They fought for worker's compensation, child labor laws, minimum wage and maximum hours legislation; they enacted anti-trust laws, improved living conditions in urban slums, instituted the graduated income tax, won women the right to vote, and laid the groundwork for Roosevelt's New Deal. Nugent shows that the progressives--with the glaring exception of race relations--shared a common conviction that society should be fair to all its members and that governments had a responsibility to see that fairness prevailed. Offering a succinct history of the broad reform movement that upset a stagnant conservative orthodoxy, this Very Short Introduction reveals many parallels, even lessons, highly appropriate to our own time. About the Series: Combining authority with wit, accessibility, and style, Very Short Introductions offer an introduction to some of life's most interesting topics. Written by experts for the newcomer, they demonstrate the finest contemporary thinking about the central problems and issues in hundreds of key topics, from philosophy to Freud, quantum theory to Islam.
