discourse of tourism and tourists as they relate to politics, through a series of case studies from around the world written by specialists with an emphasis on linking theory to practice. That tourism is a profoundly important economic sector for most countries and regions of the world is widely accepted, even if some of the detail remains controversial. However, as tourism matures as a subject, the theories underpinning it necessarily need to be more sophisticated; tourism cannot be simply 'read' as a business proposition with a series of impacts. Wider questions of politics, power and identity need to be articulated, investigated and answered. While the making and consuming of tourism takes place within complex political milieux with multiple stakeholders competing for

benefit, the implications are not fully understood. Literature on tourism and politics is surprisingly limited. This book will make a substantial contribution to the theoretical framework of tourism. *Examines the intersection between tourism, tourists, and politics *Uses international case studies to link theory to practice *Adopts a critical perspective and contributes to the theoretical framework of tourism

World History Teaching in Asia is the first broad survey of the content and approaches used to teach world history in secondary schools and colleges in Asia. The collection has been crafted by scholars and educators whose goal was to shed light on the importance of history education and to foster understanding of and between Asian countries. These essays show how the teaching of world history in Asian countries has developed since World War II, with many interesting parallels, including the issue of Eurocentrism, but also distinctive national trends, and considerable changes over time. At a time when many Asian countries are making great strides in education, this study of history education in Asia will be of real interest to educators, history scholars, and policy-makers
