This Synthesis Lecture presents a discussion of Quality of Service (QoS) in wireless networks over unlicensed spectrum. The topic is presented from the point of view of protocols for wireless networks (e.g., 802.11) rather than the physical layer point of view usually discussed for cellular networks in the licensed wireless spectrum. A large number of mobile multimedia wireless applications are being deployed over WiFi (IEEE 802.11) and Bluetooth wireless networks and the number will increase in the future as more phones, tablets, and laptops are equipped with these unlicensed spectrum wireless interfaces. Achieving QoS objectives in wireless networks is challenging due to limited wireless resources, wireless nodes interference, wireless shared media, node mobility, and diverse topologies. The author presents the QoS problem as (1) an optimization problem with different constraints coming from the interference, mobility, and wireless resource constraints and (2) an algorithmic problem with fundamental algorithmic functions within wireless resource management and protocols. Table of Contents: Preface / Basics of Quality of Service in Wireless Networks / QoS-Aware Resource Allocation / Bandwidth Management / Delay Management / Routing / Acknowledgment / References / Author Biography

The suburban lawn sprouts a crop of contradictory myths. To some, it's a green oasis; to others, it's eco-purgatory. Science writer Hannah

Holmes spent a year appraising the lawn through the eyes of the squirrels, crows, worms, and spiders who think of her backyard as their own. *Suburban Safari* is a fascinating and often hilarious record of her discoveries: that many animals adore the suburban environment, including bears and cougars venturing in from the woods; how plants, in their struggle for dominance, communicate with their own kind and battle other species; and that ways already exist for us to grow healthier, livelier lawns.

A course-changing event in one's life can happen in minutes. Or it can form slowly, a primitive webbing splaying into fingers of discontent, a minuscule trail hardening into the sinewed spine of resentment. So it was with the mill workers as the heat-soaked days of summer marched on. City girl Jessie, orphaned at sixteen, struggles to adjust to life with her barely known aunt and uncle in the tiny town of Bradleyville, Kentucky. Eight years later (1968), she plans on leaving--to follow in her revered mother's footsteps of serving the homeless. But the peaceful town she's come to love is about to be tragically shattered. Threats of a labor strike rumble through the streets, and Jessie's new love and her uncle are swept into the maelstrom. Caught between the pacifist teachings of her mother and these two men, Jessie desperately tries to deny that Bradleyville is rolling toward violence and destruction.

Something strange was happening in Lily Dale. Marena Jacobs went there to search for the one true man that she loved. David had vanished over a year ago and she was beginning to think he was gone forever. The small scrap of paper with angelic script was all she had to go on. Gabe, a man with psychic abilities befriends Marena and they stumble upon an incredible secret about the town's people that no one would ever believe. Gabe's abilities are no match for Samuel though, who has powers of his own. He is from an ancient sect of fallen angels called the Nephilim, and his one goal is to seduce Marena and destroy the love she has for David.

Architectural facades now have the potential to be literally kinetic, through automated sunscreens and a range of animated surfaces. This book explores the aesthetic potential of these new types of moving facades. Critique of theory and practice in architecture is combined here with ideas from kinetic art of the 1960 ' s. From this background the basic principles of kinetics are defined and are used to generate experimental computer animations. By classifying the animations, a theory of kinetic form called ' state change ' is developed. This design research provides a unique and timely resource for those interested in the capacity of kinetics to enliven the public face of architecture. Extra material including animations can be seen at www.kineticarch.net/statechange

Award winning Amazon Best Seller in Post-Apocalyptic and Dystopian Science Fiction.-- A dystopian book series about love and the fight for freedom. -- During the man-made apocalypse in the 21st century, a group of elites killed off a majority of the population. Only two groups of survivors remained--those selected to reside inside the Los Angeles City Center and the rebels, relegated to live on the Outside. Centuries later, Ava Rhodes is one of five potential successors competing to become the next Queen of the City Center. A week prior to the final competitions she encounters Joseph, a rebel from the Outside, and discovers her utopian home is actually a prison and breeding facility aimed at designing the perfect human. She escapes with Joseph to the Outside world, sending the City Center's leader, Chief Morray, into an obsessive pursuit for his property. Along the journey, Ava falls in love with Joseph and discovers an even darker secret about the fate of her people. She must decide whether to stay with Joseph, or save her people from destruction.

What happens when the tidy, prosperous life of an urban couple is turned inside out by a tragedy with unexpected consequences? After a car crash leaves their friend Marcus dead and his wife Sarah in a coma, Ana and James are shocked to discover that they have become the legal guardians of a 2½-year-old, Finn. Finn's crash-landing in their lives throws into high relief deeply rooted, and sometimes long-hidden, truths about themselves, both individually and as a couple. Several chaotic, poignant, and life-changing weeks as a most unusual family give rise to an often unasked question: Can everyone be a parent?

"These books are little gems. They are beautifully written, amusing, and intensely readable." —Alexander McCall Smith, author of *The No. 1 Ladies' Detective Agency* Long-held secrets, deadly lies, a sports scandal, and a poisoned helping of butter chicken -- all in a day's work for the head of Delhi's Most Private Investigators, in this latest book in the delightful Vish Puri detective series. When the father of a Pakistani star cricket player falls dead during a glamorous India Premier League dinner, clearly it isn't just a case of Delhi Belly. But which of the VIPs at the victim's table is responsible for poisoning the man's butter chicken? And was the victim killed for his involvement with a gambling syndicate that controls cricket's illegal billion-dollar betting industry? The answers seem to lie across the border in Pakistan -- the one country Puri swore he would never set foot in. Or do they? For Puri's beloved Mummy-ji, who has a unique insight into the killing, believes there is much more to this murder than meets the eye. Puri and Mummy-ji's search for the truth will lead them to uncover decades-old secrets and tragedies thought best forgotten in their most compelling case yet.
