Avoid typical errors and maximise your performance on test day with the IELTS Common Mistakes series. This handy little book highlights the real mistakes students make in the IELTS test and shows how to avoid them. Suitable for both IELTS Academic and IELTS General Training, it's perfect for students aiming for bands 5.0-6.0. Each unit targets a key problem area. IELTS-style exercises with clear explanations show you how to use the language accurately to achieve your target band score, and you can check what you've learned in the units with regular tests. Previous title Common Mistakes at IELTS Intermediate.

"These Practice Materials are intended to give IELTS candidates an idea of what the test is like. They also give candidates the opportunity to test themselves to see whether their English is at the level required to take IELTS. These practice materials are approved by the British Council, Cambridge ESOL

and IDP: IELTS Australia" -- Introd.

With tips on vocabulary learning and how to approach the test, this book covers all the vocabulary that is needed to achieve a band score of 6.5 and above

The basis of adequate prepping is being prepared for both common and dire events that may occur under the worst of all possible circumstances. These circumstances might include the breakdown in normal emergency support services (such as calling 911), the lack of an ability to obtain additional supplies, and the probability that you will not be able to rely on anyone but members of your immediate group or yourself. Prepping requires forethought with regard to food, water supplies, power, and protection – all areas of significant technical preparation. Self-reliant medical care is no exception. This book provides the basis of prevention, identification, and long-term management of survivable medical conditions and can be performed with minimal training. It helps you identify sources of materials you will need and should stock-pile, it discusses storage issues, and directs you to sources for more complex procedures that require advanced concepts of field-expedient techniques used by trained medical persons such as surgeons, anesthesiologists, dentists, or midwives and obstetricians.
