This book documents the progress that managerial and professional women have made in advancing their careers, and the challenges and opportunities that remain. In the context of increasing numbers of women entering the workplace and indeed pursuing profes

Employee-Organization Linkages: The Psychology of Commitment, Absenteeism, and Turnover summarizes the theory and research on employee-organization linkages, including the processes through which employees become linked to work organizations, the quality of such linkages, and how linkages are weakened or severed. The text identifies the determinants of employee commitment, absenteeism, and turnover, as well as their consequences for the individual, work groups, and the larger organization. The book also presents conceptual models on how employees become committed to, decide to be absent from, and decide to leave their organizations. Human resource practitioners, managers, employers, and industrial psychologists will find the book very informative and insightful.

Presents key principles of teacher education and concrete examples from successful programs.

Technical and vocational education and training (TVET) research has become a recognized and well-defined area of interdisciplinary research. This is the first handbook of its kind that specifically concentrates on research and research methods in TVET. The book ' s sections focus on particular aspects of the field, starting with a presentation of the genesis of TVET research. They further feature research in relation to policy, planning and practice. Various areas of TVET research are covered, including on the vocational disciplines and on TVET systems. Case studies illustrate different approaches to TVET research, and the final section of the book presents research methods, including interview and observation methods, as well as of experimentation and development. This handbook provides a comprehensive coverage of TVET research in an international context, and, with special focus on research and research methods, it is a cutting-edge resource and reference.

Today is an information age and a tremendous flow of information is emerging in all fields throughout the world. As such, it has become very difficult to manage the information manually due to the exponential growth of literature. The problem of providing timely information is not due to lack of information, but the way in which it is handled to enable the user to fulfil his/her needs. The traditional way of information handling methods have become almost ineffective in providing the specific information of an individual's interest. To overcome this problem, the Libraries, Learning Resource Centers and Documentation Centers ought to change their attitude towards information handling. The user community is also expected to change their methodology, attitude and approach to information searching. ICT-based information handling is a viable solution in this direction. Recent technological developments such as explosive growth of Internet and WWW, sophisticated search engines, fast processing power and reducing cost of the computers, high bandwidth networks and increasing number of electronic publications assist the libraries in providing extensive access to the variety of information sources and provide a way to enrich the teaching and learning environment. Accessibility to the required information at a fast rate as well as quick response to the query is the expectations of users. These factors are responsible for the changes in library environment. Growth and development of ICT have made significant impact on library and information services. It has significantly changed the shape of information management and information services in the libraries and information centres. However, this book deals with the application of ICT based library and information services. This work would be found useful by students and research scholars in humanities and social science disciplines particularly B.L. & I.Sc., M.L. & I.Sc., and Ph.D. scholars and information professionals who aim to carry out a study in library and information science. This book would be highly useful to fulfil the research needs of scholars in other disciplines of social sciences as well.

The idea of human resource management has become topical and controversial. The term suggests that people in any organization are an asset to be upgraded and fully utilized rather than merely a variable cost to be minimized. This in turn implies that the way in which people are managed is a matter of crucial strategic concern. Increased international competition has produced various initiatives world-wide for new approaches to management, in particular human resource management. This searching set of interpretations, first published in 1983, will be of interest to serious practitioners and students alike.

This book constitutes the refereed proceedings of the European Conference on Information Literacy, ECIL 2013, held in Istanbul Turkey, in October 2013. The 73 revised full papers presented together with two keynotes, 9 invited papers and four doctoral papers were carefully reviewed and selected from 236 submissions. The papers are organized in topical sections on overview and research; policies and strategies; theoretical framework; related concepts; citizenship and digital divide; disadvantaged groups; information literacy for the workplace and daily life; information literacy in Europe; different approaches to information literacy; teaching and learning information literacy; information literacy instruction; assessment of information literacy; information literacy and K-12; information literacy and higher education; information literacy skills of LIS students; librarians, libraries and ethics.

For nearly thirty years, Teacher Effectiveness Training, or the T.E.T. book, based on Dr. Thomas Gordon's groundbreaking program, has taught hundreds of thousands of teachers around the world the skills they need to deal with the inevitable student discipline problems effectively and humanely. Now revised and updated, T.E.T. can mean the difference between an unproductive, disruptive classroom and a cooperative, productive environment in which students flourish and teachers feel rewarded. You will learn:

- What to do when students give you problems
- How to talk so that students will listen
- How to resolve conflicts so no one loses and no one gets hurt
- How to best help students when they're having a problem
- How to set classroom rules so that far less enforcement is necessary

How to increase teaching and learning time

This volume contains select papers presented during the Functional Textiles and Clothing Conference 2020 held at Indian Institute of Technology Delhi. The volume covers recent developments, challenges and opportunities in the field of functional and protective clothing; functional printing and finishing; sustainable production and supply chain; and testing and characterisation. This volume will be of interest to researchers, professional engineers, entrepreneurs, and market stakeholders interested in functional textiles and clothing.
