Mirrors, moving objects and sounds all encourage a baby to lift his/her head and will in turn strengthen the neck muscles. Newborn babies have not developed fine motor skills at this early age, but they do have reflexes and can hold and grip onto fingers when they are placed in their palm. With use, these muscles will become stronger before the reflex regresses at about 4 months

because it's based on the latest medical research and recommendations from leading health organizations. *Pregnancy, Childbirth, and the Newborn* provides the information and guidance you need to make informed decisions about having a safe and satisfying pregnancy, birth, and postpartum period--decisions that reflect your preferences, priorities, and values. Unlike pregnancy guides that can overwhelm and alarm by telling you up front all the things that can possibly go wrong, this book first describes normal, healthy processes, their typical variations, and the usual care practices for monitoring them. Only then does it cover possible complications and the care practices and procedures for resolving them. Throughout, the presentation is crystal-clear, the tone is reassuring, and the voice is empowering. And the language is inclusive, reflecting today's various family configurations such as
