This book  
examines  
computer  
architecture,  
computability  
theory, and the  
history of  
computers from  
the perspective  
of minimalist

This approach is

different than

that taken in

this book is

The organization  
of the book is as  
follows. First,  
the reasons for  
studying such an

given. Then, the  
history and  
evolution of  
instruction sets

Stallings

is studied with  
an emphasis on  
how modern  
computing has

computing. Also,  
previous  
computer systems  
are reviewed to  
show how their  
features relate  
to one  
instruction

the primary

forms of one

computing are

examined. The

theories of

computation and

of Turing

also reviewed to

processor

and instruction

sets are then

mapped into

single
