What drives wealthy and powerful people to white-collar crime? Why They Do It is a breakthrough look at the dark side of the business world. From the financial fraudsters of Enron, to the embezzlers at Tyco, to the insider traders at McKinsey, to the Ponzi schemer Bernie Madoff, the failings of corporate titans are regular fixtures in the news. In Why They Do It, Harvard Business School professor Eugene Soltes draws from extensive personal interaction and correspondence with nearly fifty former executives as well as the latest research in psychology, criminology, and economics to investigate how once-celebrated executives become white-collar criminals. White-collar criminals are not merely driven by excessive greed or hubris, nor do they usually carefully calculate costs and benefits before breaking the law. Instead, Soltes shows that most of the executives who committed crimes made decisions the way we all do-on the basis of their intuitions and gut feelings. The trouble is that these gut feelings are often poorly suited for the modern business world where leaders are increasingly distanced from the consequences of their decisions and the individuals they impact. The extraordinary costs of corporate misconduct are clear to its victims. Yet, never before have we been able to peer so deeply into the minds of the many prominent perpetrators of white-collar crime. With the increasing globalization of business threatening us with even more devastating corporate misconduct, the lessons Soltes draws in Why They Do It are needed more urgently than ever.

Crime Types and Criminals is an essential introduction to the study of criminology, focusing on crime types in particular. This book provides broad coverage of all major crime types, as well as coverage of research methods and theory. This book can be used both as a stand-alone and supplementary text in courses such as introduction to criminology, crime and society, deviant behaviour, crime profiling, and many other courses within the criminology and criminal justice discipline. Unlike many of the current criminology books on the market, this is a brief book that really talks about all kinds of crime and criminals in detail in a way to capture and retain student interest.

This book offers a clear, up-to-date, comprehensive, and theoretically informed introduction to criminal psychology, exploring how psychological explanations and approaches can be integrated with other perspectives drawn from evolutionary biology, neurobiology, sociology, and criminology. Drawing on examples from around the world, it considers different types of offences from violence and aggression to white-collar and transnational crime, and links approaches to explaining crime with efforts to prevent crime and to treat and rehabilitate offenders. This revised and expanded second edition offers a thorough update of the research literature and introduces several new features, including: detailed international case studies setting the scene for each chapter, promoting real-world understanding of the topics under consideration; a fuller range of crime types covered, with new chapters on property offending and white-collar, corporate, and environmental crime; detailed individual chapters exploring prevention and rehabilitation, previously covered in a single chapter in the first edition; an array of helpful features including learning objectives, review and reflect checkpoints, annotated lists of further reading, and two new features: ' Research in Focus ' and ' Criminal Psychology Through Film '. This textbook is essential reading for upper undergraduate students enrolled in courses on psychological criminology, criminal psychology, and the psychology of criminal behaviour. Designed with the reader in mind, student-friendly and innovative pedagogical features support the reader throughout.

This book promotes the notion of second chances and the importance of human services within the communities most affected by crime and the criminal justice system. Recognition of the fallibility of humans and the necessity of redemption is the first step to change our attitude toward guilt and punishment. Barring citizens with criminal records from obtaining housing, employment, education, and public benefits like Medicaid and food stamps is not only unjust but unproductive for a human society. The contributors to this volume argue that second chances are a foundational principle of the human services field.

This three-volume work offers a comprehensive review of the pivotal concepts, measures, theories, and practices that comprise criminology and criminal justice. No longer just a subtopic of sociology, criminology has become an independent academic field of study that incorporates scholarship from numerous disciplines including psychology, political science, behavioral science, law, economics, public health, family studies, social work, and many others. The three-volume Encyclopedia of Criminology presents the latest research as well as the traditional topics which reflect the field's multidisciplinary nature in a single, authoritative reference work. More than 525 alphabetically arranged entries by the leading authorities in the discipline comprise this definitive, international resource. The pivotal concepts, measures, theories, and practices of the

field are addressed with an emphasis on comparative criminology and criminal justice. While the primary focus of the work is on American criminology and contemporary criminal justice in the United States, extensive global coverage of other nations' justice systems is included, and the increasing international nature of crime is explored thoroughly. Providing the most up-to-date scholarship in addition to the traditional theories on criminology, the Encyclopedia of Criminology is the essential one-stop reference for students and scholars alike to explore the broad expanse of this multidisciplinary field.
