Covers gender, ethnicity, and stratification concepts in accordance with contemporary thinking. This book present students with examples of local responses to challenging globalization issues, and is designed to provide students with a cross-cultural survival guide for living in the diverse, multicultural world.

Haviland et al ' s streamlined market leading text presents cultural anthropology in vivid, accessible terms that shows students how the field is relevant to understanding the complex world around them. The authors present the fundamental concepts from a holistic perspective using three unifying themes to frame the text: 1) the varied ways humans face the challenges of existence, 2) the connections between culture and biology in shaping human beliefs and behavior, and 3) the impact of globalization on peoples and cultures around the world. They also integrate coverage of race, class, gender, and ethnicity throughout the text, and in this edition, a new chapter Ethnographic Research: Its History, Methods, and Theories, covers theory and methods more explicitly to help instructors meet general education requirements. The text ' s superlative writing, strong pedagogical program, rich visuals, and robust collection of supplements provide exceptional teaching and learning experiences for instructors and students alike. THE ESSENCE OF ANTHROPOLOGY features an experienced and diverse author team with expertise in all subfields of anthropology. With an eye to visual and written clarity, the authors present anthropology from an integrated, holistic perspective. They use three unifying themes as a framework to tie the book together and keep students focused: systemic adaptation to emphasize that every culture, past and present, is an integrated and dynamic system of adaptation; biocultural connections that highlight the integration of human culture and biology in the steps humans take to meet the challenges of survival; and the emergence of globalization and its disparate impact on peoples and cultures around the world. Pedagogical elements support these main themes and give deeper insight into the meaning and relevance of a wide range of topics covered in the general narrative by tying examples to behavior today. Insightful questions foster critical thinking, additional Visual Counterpoints widen the book's array of compare-and-contrast examples, and a new Digging into Anthropology feature provides a hands-on approach to anthropological methods by giving active learning opportunities related to each chapter's content. In addition, the authors have broadened viewpoints to offer explanations and examples from different points of view. Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.
