Based on an author's true story of domestic violence. Escape from the Mad Man was created to help you explain to your children why you took them to a women's shelter or other safe haven. Your first nights of freedom can be chaotic. Your children will have many urgent questions. This book provides you with the familiar form of a picture book to help answer those questions and offer reassurance at a very stressful time. The illustrations do not depict acts of violence.

A truly resourceful and supporting workbook which will help you reach your health goals in a short space of time. A Must Have!

Isaac Newton wrote laws that explain how and why objects move. The first law states that an object will not change its velocity unless a net force acts on it. The second law explains how acceleration, mass, and force are related. The third law states that for every action force, there is an equal and opposite reaction force.

Harnessing the wind can be a tricky business, but in this ground-breaking book the authors provide step-by-step, illustrated instructions for building a wind generator in a home workshop and then installing it in an off-grid home electrical system. Even if you don't plan on building your own turbine, this book is packed with valuable information for anyone considering wind energy. It covers the basic physics of how the energy in moving air is turned into electricity, and most importantly, it will give you a realistic idea of what wind energy can do for you--and what it can't.
