Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in

Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Witchcraft. Arson. Going AWOL. Some nuns in sixteenth- and seventeenth-century Italy strayed far from the paradigms of monastic life. Cloistered in convents, subjected to stifling hierarchy, repressed, and occasionally persecuted by their male superiors, these women circumvented authority in sometimes extraordinary ways. But tales of their transgressions have long been buried in the Vatican Secret Archive. That is, until now. In *Nuns Behaving Badly*, Craig A. Monson resurrects forgotten tales and restores to life the long-silent voices of these cloistered heroines. Here we meet nuns who dared speak out about physical assault and sexual impropriety (some real, some

imagined). Others were only guilty of misjudgment or defacing valuable artwork that offended their sensibilities. But what unites the women and their stories is the challenges they faced: these were women trying to find their way within the Catholicism of their day and through the strict limits it imposed on them. Monson introduces us to women who were occasionally desperate to flee cloistered life, as when an entire community conspired to torch their convent and be set free. But more often, he shows us nuns just trying to live their lives. When they were crossed—by powerful priests who claimed to know what was best for them—bad behavior could escalate from mere troublemaking to open confrontation. In resurrecting these long-forgotten tales and trials, Monson also draws attention to the predicament of modern religious women, whose “ misbehavior ” —seeking ordination as priests or refusing to give up their endowments to pay for priestly

wrongdoing in their own archdioceses—continues even today. The nuns of early modern Italy, Monson shows, set the standard for religious transgression in their own age—and beyond.

The first comprehensive study of the dominant form of solo singing in Renaissance Italy prior to the mid-sixteenth century.

Magicians, necromancers and astrologers are assiduous characters in the European golden age theatre. This book deals with dramatic characters who act as physiognomists or palm readers in the fictional world and analyses the fictionalisation of physiognomic lore as a practice of divination in early modern Romance theatre from Pietro Aretino and Giordano Bruno to Lope de Vega, Calderón de la Barca and Thomas Corneille.

Modern seismology has faced new challenges in the study of earthquakes and their physical characteristics. This volume is dedicated to the use of new approaches and presents a state-of-the-art in historical seismology. Selected historical and recent earthquakes are chosen to document and constrain related seismic parameters using updated methodologies in the macroseismic analysis, field observations of damage distribution and tectonic effects, and modelling of seismic waveforms.

In 1638, a small book of no more than 92 pages in octavo was published “ appresso Gioanne Calleoni ” under the title “ Discourse on the State of the Jews and in particular those dwelling in the illustrious city of Venice. ” It was dedicated to the Doge of Venice and

his counsellors, who are labelled “ lovers of Truth. ” The author of the book was a certain Simone (Sim a) Luzzatto, a native of Venice, where he lived and died, serving as rabbi for over fifty years during the course of the seventeenth century. Luzzatto ’ s political thesis is simple and, at the same time, temerarious, if not revolutionary: Venice can put an end to its political decline, he argues, by offering the Jews a monopoly on overseas commercial activity. This plan is highly recommendable because the Jews are “ wellsuited for trade, ” much more so than others (such as “ foreigners, ” for example). The rabbi opens his argument by recalling that trade and usury are the only occupations permitted to Jews. Within the confines of their historical situation, the Venetian Jews became particularly skilled at trade with partners from the Eastern Mediterranean countries. Luzzatto ’ s argument is that this talent could be put at the service of the Venetian

government in order to maintain – or, more accurately, recover – its political importance as an intermediary between East and West. He was the first to define the role of the Jews on the basis of their economic and social functions, disregarding the classic categorisation of Judaism 's alleged privileged religious status in world history. Nonetheless, going beyond the socio-economic arguments of the book, it is essential to point out Luzzatto 's resort to sceptical strategies in order to plead in defence of the Venetian Jews. It is precisely his philosophical and political scepticism that makes Luzzatto 's texts so unique. This edition aims to grant access to his works and thought to English-speaking readers and scholars. By approaching his texts from this point of view, the editors hope to open a new path in research into Jewish culture and philosophy that will enable other scholars to develop new directions and new perspectives,

stressing the interpenetration between Jews and the surrounding Christian and secular cultures.

In "The Jesuit Order as a Synagogue of Jews" the author explains how Christians with Jewish family backgrounds went within less than forty years from having a leading role in the foundation of the Society of Jesus to being prohibited from membership in it. The author works at the intersection to two important historical topics, each of which attracts considerable scholarly attention but that have never received sustained and careful attention together, namely, the early modern histories of the Jesuit order and of Iberian purity of blood concerns. An analysis of the pro- and anti-converso texts in this book (both in terms of what they are claiming and what their limits are) advance our understanding of early modern, institutional Catholicism at the

intersection of early modern religious reform and the new racism developing in Spain and spreading outwards.

Simone Verovio was the first printer to produce a substantial number of musical prints using engraved copper plates. This intaglio printing technique not only allowed him to print on demand, but also to combine different kinds of notation on one page opening: voice parts with corresponding harpsichord and lute intabulations. This detailed comparison of intaglio and relief printing techniques in the editions associated with Verovio sheds light on the production of sheet music around 1600 and the comparison of the vocal and instrumental parts provides ground-breaking insights into historical performance practice.
