Technical Foundations
of Neurofeedback
provides, for the first
time, an authoritative
and complete account of
the scientific and
technical basis of EEG
biofeedback. Beginning
with the physiological
origins of EEG rhythms,
Collura describes the

basis of measuring brain activity from the scalp and how brain rhythms reflect key brain regulatory processes. He then develops the theory as well as the practice of measuring, processing, and feeding back brain activity information for biofeedback training. Combining both a "top down" and a "bottom up" approach, Collura
