The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

The book "Solutions to Practical Problems in Accountancy-XII for Volume 1" is of utmost utility for the students of class XII of NCERT/CBSE and various other boards. This book includes all the solutions to numerical and practical problems included in the related book. For the help of the students, the solutions of the book are simple, comprehensible and easily understandable. The authors of this solution book are same as the Accountancy XII book.

The rapid proliferation of unincorporated business forms has moved beyond the scope of traditional Corporations and Agency/Partnership courses and textbooks, which leaves students without the necessary knowledge to competently advise business clients. Unincorporated Business Entities was designed to fill that widening gap in the existing curriculum. Unincorporated Business Entities is designed for a three-semester-hour course and has the following features: Like its predecessors, the new edition of Unincorporated Business Entities takes a business planning approach to teaching the modern law of partnerships and other unincorporated firms. The material on LLCs has largely been rewritten, reflecting the rapid development in this form over the last several years. Each chapter contains new and updated notes and problems that provide a "hands-on" approach to the consequences of, and planning and drafting for, issues in agency, partnership, limited partnerships, LLCs, and limited liability partnerships. The materials on partners' financial rights now include a short primer on financial accounting. The Teacher's Manual is almost six-fold expanded from previous versions. It contains approaches to organizing classes, synopses of all the cases, lecture outlines, proposed questions and answers, discussions of answers to all the problems, diagrams of the complex cases, and flow charts of complex statutory analysis in areas like partnership dissolution and winding up. The Appendix also contains the partnership, limited partnership, and limited liability company statutes you will need for reference purposes.
