Haig dedicated himself to setting up the British Legion to help the soldiers who had fought for him, and their families. There is a gulf between popular perceptions of Haig (in the 1990s the Daily Express launched an unsuccessful campaign to have the statue of him removed from Whitehall) and the scholarship of military historians, many of whom hold him in high regard.

Educated Soldier by John Terraine - AbeBooks

508 pages, RRP \$35.00. Field Marshal Earl Haig has not had a good press since at least 1918. Generations of historians, academic and popular, have criticised his command of the British Expeditionary Force on the Western Front, and he has also been the butt of one-liners such as that (possibly apocryphal) attributed to a German general of the First World War, that the British soldiers were 'lions led by donkeys'.

Douglas Haig: The Educated Soldier - MILITARY BOOK REVIEWS ...

Ironically, 1963 saw also the publication of the first major attempt to restore Haig's reputation - John Terraine's Douglas Haig, the Educated Soldier. The book is dense narrative, and does not make easy reading, but in it are some of the arguments that Terraine was to develop and present much more energetically and attractively in *The Smoke and the Fire* (1980).

Books on Haig - the Haig Debate

D.H. was the most "educated" soldier in the Empire, and arguably the whole Europe, by which Terraine means he's the one who has learned the art of war and applied them successfully, this in contrast to the accepted view that D.H. is a blockhead, a total idiot who can think of nothing else but attrition, and one who failed his Staff College examination!

Douglas Haig: The Educated Soldier: Terraine, John: Amazon ...

John Alfred Terraine was an English military historian, and a TV screenwriter. He is best known as the lead screenwriter for the landmark 1960s BBC-TV documentary *The Great War*, about the First World War, and for his defence of British General Douglas Haig – who commanded the British Expeditionary Force on the Western Front from late 1915 until the end of the war – against charges that he was "The Butcher of the Somme".

John Terraine - Wikipedia

Douglas Haig returned to Britain in 1919 after the end of the Great War to no grand position. He became a much-maligned character in the historiography in the decades afterwards. But contrary to ca...

Twice within 25 years Britain was threatened with starvation by the menace of the U-Boat. In this study of submarine warfare, the author explains why Winston Churchill wrote "the only thing that ever frightened me during the war was the U-Boat peril". Until it had been overcome, the Anglo-American entry into Europe in 1944 would have been impossible. John Terraine concentrates on the combatants themselves, both German and Allied, but does not overlook the three main factors in the equation—the political, the military and the technological, as well as the intelligence, the weapons and the devices both sides employed in order to outwit each other. He also focuses on the fighting men on either side, seeing the action from "where it was at".

John Terraine, perhaps the most distinguished historian of the First World War, addresses a number of particular topics in this collection of fascinating essays. The author's lucid style stands out in making this book a model of accurate, well-argued and readable military history. 'John Terraine's nine essays either help our understanding or stimulate our thought'. Correlli Barnett 'another opportunity to admire his clarity of thought and his excellent style'. Sunday Times 'John Terraine reflects with insight and compassion on the appalling shambles of the Western Front'. The Times

Traditionally, 'the right of the line' is the vanguard, the place of honour and greatest danger in battle. In this history of the Royal Air Force during the European War of 1939-45, John Terraine shows how the RAF, which in 1939 was small and inadequate for the task it was called upon to perform had, by the end of the war, taken up its proper position. He describes the build-up to war, the early tests in France and at Dunkirk, the Battle of Britain, the Battle of the Atlantic, the RAF in North Africa and the Mediterranean, the strategic air offensive over Germany and eventual victory in Europe. 'His best book yet' The Times 'John Terraine is a fine historian but he also believes that history should be exciting and readable' The Listener

The Battle of Mons takes its place in the history of the British army beside Corunna and Dunkirk. Initially, all three were defeats, saved from disaster by the courage of the soldiers and the skill of some of the commanders in the field, and paving the way to great feats of arms and final success. In the context of the whole of the First World War, Mons was a small scale affair; comparatively short in duration, involving divisions rather than armies, and resulting in casualties that were light indeed by the standard of later battles of attrition. But, especially from the British viewpoint, its importance was crucial, partly because it was the first time for close on a hundred years that a British Army had been engaged in warfare on the continent of Europe, and partly because that army passed straight from the dejection of defeat to the exhilaration of the Battle of the Marne one of the decisive battles of the War

'Well written and persuasive ... objective and well-rounded. ... this scholarly rehabilitation should be the standard biography' **** Andrew Roberts, Mail on Sunday 'A true judgment of him must lie somewhere between hero and zero, and in this detailed biography Gary Sheffield shows himself well qualified to make it ... a balanced portrait' Sunday Times 'Solid scholarship and admirable advocacy' Sunday Telegraph Douglas Haig is the single most controversial general in British history. In 1918, after his armies had won the First World War, he was feted as a saviour. But within twenty years his reputation was in ruins, and it has never recovered. In this fascinating biography, Professor Gary Sheffield reassesses Haig's reputation, assessing his critical role in preparing the army for war.

For seventy years Douglas Haig had been portrayed on the one hand as the 'Butcher of the Somme' – inept, insensitive and archaic; and on the other as the 'Saviour of Britain' – noble, unselfish and heroic. This polarised, strident and ultimately inconclusive argument had resulted in Haig becoming detached from his own persona; he had become a shallow symbol of a past age to be pilloried or praised. The middle ground in the Haig debate had been as barren as No Man's Land. There should be no mystery about Haig. Certain from a very early age of his own greatness, he preserved every record of his achievements: diaries, letters, official reports etc. The opinions of his contemporaries are likewise readily available. But until this book the material had not been used to construct a complete and accurate picture. Critics and supporters have raided the historical records for evidence of the demi-god or demon and have ignored that which conflicts with their preconceptions. They have likewise raced through his early life in order to get to the war, in the process ignoring the complex process of his development as a soldier. Analyses of Haig's command have consequently been as shallow as the prevailing images of the man. After eight years of painstaking and detailed research into previously neglected sources, Gerard De Groot gave us a more complete and balanced picture. This book, originally published in 1988, which will appeal both to the general and the specialised reader, is not simply a critique of Haig's command in the war, but an exploration into his personality. Close attention to his early life and career reveals him as a creature of his society, a man who mirrored both the virtues and the faults of Edwardian Britain. What emerges is an intense, dedicated, but ultimately flawed servant of his country whose ironic fate it was to grow up in one age and to command in another.
