world around him resulted in his death in the eruption of Vesuvius in AD 79, but his *Natural History* was to remain influential for centuries after his death. Central to Pliny's thought was the relationship between man and nature, highlighted in his study of the human race in Book 7, where he ponders topics as diverse as monstrous races, sex changes, breech births and near-death experiences. Although the Ancient Greeks had a form of musical notation, it was not passed on to the medieval Latin West. This comprehensive study investigates the breadth of use of musical notation in Carolingian Europe, including many examples previously unknown in studies of notation, to deliver a crucial foundational model for the understanding of later Western notations. An overview of the study of neumatic notations from the French monastic scholar Dom Jean Mabillon (1632–1707) up to the present day precedes an examination of the function and potential of writing in support of a musical practice which continued to depend on trained memory. Later chapters examine passages of notation to reveal those ways in which scripts were shaped by contemporary rationalizations of

musical sound. Finally, the new scripts are situated in the cultural and social contexts in which they emerged.
