Fiat money refers to objects that are money because the law decrees or orders them to be money. Today's fiat money consists of currency (the bills and coins that we use in the United States today) and deposits at banks and other depository institutions. Deposits are money because they can be converted into currency and because they are used to settle debts.

Working from a macro framework based on the Fed's use of interest rate as its major policy instrument, Ball presents the core concepts necessary to understand the problems affecting the stock market, and the causes of recessions and banking crises. Underlying this framework are the intellectual foundations for the Fed's inflation targeting using the dynamic consistency problem facing policymakers.
