They thoroughly read the material and offered critical and detailed commentary. The outcome is a balanced approach to micro and macro economics, to both Keynesian and classical views, and to the theory and application of economics concepts. Current events are treated in a politically-balanced way as well.

Rethinking the Future of Europe has brought together three contrasting collections of contributions: the incrementalist perspective concerning the step by step development of Europe, the more radical reform/restructuring approach to the future of Europe, and a view of Europe from the outside.

The world has become obsessed with the Western notions of progress,

development, and globalization, the latter a form of human and economic homogenization. These processes, through the aegis of the United Nations, are comparatively monitored. Those nations deemed to be ‘ lagging behind ’ are then provided with foreign aid and developmental assistance. For nearly seventy years, India has sought its place in this global endeavour; yet, even today, abject poverty and backwardness can be observed in districts in almost every state; with the highest concentration of such districts found in the state of Bihar and a cultural enclave, known as Mithila. Development in India has been elusive because it is difficult to define; and because the Western concepts of development and progress have no absolute equivalents within many non-

Western settings. As a consequence, development programmes often fail because they are unable to ask the right questions, but equally important is the political economy derived from foreign aid. For politicians, there is no long-term benefit to be derived from successful development. In general, foreign aid only serves to corrupt governments and politicians and, in the end, does very little for those who need help. The struggling states of Bihar and Mithila serve as extreme examples of India ' s problems. Development here has been thwarted by a hereditary landed aristocracy supported by religion, casteism, custom, social stratification, tradition, and patterns of behaviour that can be traced back millennia. In turn, all these have been masterfully manipulated by co-opted politicians,

Setting forth the building blocks of banking bailout law, this book reconstructs a regulatory framework that might better serve countries during future crisis situations. It builds upon recent, carefully selected case studies from the US, the EU, the UK, Spain and Hungary to answer the questions of what went wrong with the bank bailouts in the EU, why the US performed better in terms of crisis management, and how bailouts could be regulated and conducted more successfully in the future. Employing a comparative methodology, it examines the different bailout and bank resolution techniques and tools and identifies the pros and cons of the

different legal and regulatory options and their underlying principles. In the post-2008 legal-regulatory architecture financial institution specific insolvency proceedings were further developed or implemented on both sides of the Atlantic. Ten years after the most recent financial crisis, there is sufficient empirical evidence to evaluate the outcomes of the bank bailouts in the US and the EU and to examine a number of cases under the EU ' s new bank resolution regime. This book will be of interest of anyone in the field of finance, banking, central banking, monetary policy and insolvency law.

world, and enlivened by encounters with villagers from Rio to Beijing, tycoons, and presidents, Ruchir Sharma ' s *The Rise and Fall of Nations* rethinks the "dismal science" of economics as a practical art. Narrowing the thousands of factors that can shape a country ' s fortunes to ten clear rules, Sharma explains how to spot political, economic, and social changes in real time. He shows how to read political headlines, black markets, the price of onions, and billionaire rankings as signals of booms, busts, and protests. Set in a post-crisis age that has turned the world upside down, replacing fast growth with slow growth and political calm with revolt, Sharma ' s pioneering book is an entertaining field guide to understanding change in this era or any era.

This book conducts a detailed examination of the current form of the Hong Kong residential property regulatory system: the 2013 Residential Properties (Firsthand Sales) Ordinance (Cap 621). The author sheds light on how the new legislation promotes a number of values including information symmetry, consumer protection, the free market and business efficacy. It provides a detailed account of how the regulatory mechanism has evolved over the past three decades to catch unconscionable sales tactics (such as selective information and/or misrepresentation of location, size, completion date and past transactions) and monitor sales practices in order to protect the interests of stakeholders in this

ever-changing first-hand residential property market. This book breaks down this complicated subject matter by focusing a number of chapters each on a specific attribute of the residential property on sale. It then examines the various channels through which the information is communicated to the prospective buyer and discusses misrepresentation of the key information in sales of residential properties as criminal liability. The tension between consumer's rights on one hand and the pursuit of free market principles on the other is but one example of the conflicting values thoroughly discussed in the book, others include superstition vs. modernization and clarity vs. flexibility. Aimed at those with an interest in consumer protection and

An overview and analysis of austerity policies and labor movement resistance in several countries. Austerity policies have become the new norm throughout both the developed and developing world. Indeed, austerity has become the new buzz word in the lexicon of politicians from across the political spectrum. At the same time austerity measures have been met with mass protest, the most famous example of which is the Occupy Movement. In the not-too-distant past it would have been the labor movement at the forefront resisting policies that arguably

disproportionally target working people and their families. Throughout the twentieth century it was the labor movement that fought for all working people. However, there is an increasing assumption that the labor movement is unable to adequately defend workers from the onslaught of austerity measures. *Austerity and the Labor Movement* analyzes whether this assumption is indeed true. Examining the labor movements in the US, UK, Greece, Ireland, and Spain, Michael Schiavone provides a systematic explanation of the appeal of austerity policies in certain circles and why the labor movement in each of these countries has been largely unsuccessful in overturning such policies. He argues that the labor movement needs to make major changes and embrace social

In *Imposing Standards*, Martin Hearson shifts the focus of political rhetoric regarding international tax rules from tax havens and the Global North to the damaging impact of this regime on the Global South. Even when not exploited by tax dodgers, international tax standards place severe limits on the ability of developing countries to tax businesses, denying the Global South access to much-needed revenue. The international rules that allow tax avoidance by multinational

corporations have dominated political debate about international tax in the United States and Europe, especially since the global financial crisis of 2007–2008. Hearson asks how developing countries willingly gave up their right to tax foreign companies, charting their assimilation into an OECD-led regime from the days of early independence to the present day. Based on interviews with treaty negotiators, policymakers and lobbyists, as well as observation at intergovernmental meetings, archival research, and fieldwork in Africa and Asia, *Imposing Standards* shows that capacity constraints and imperfect negotiation strategies in developing countries were exploited by capital-exporting states, shielding multinationals from taxation and depriving nations in the Global South
