this book, which leads with an introduction to the unique nature of family businesses. Inside, the author explores the many differences between a family-owned business and a nonfamily-owned business. He discusses the major family business theories and shows how family firms make business decisions. This book also defines the significant issues prevalent in family firms and explores the most problematic issue: the succession or the transfer of ownership to the next generation. If you are a professional advisor to family firms—such as accountants, attorneys, bankers, insurance providers, and financial services—you will undoubtedly develop a better understanding for your clients.

experienced severe volatility in earnings, with airlines recording periods of substantial profits that are closely followed by periods of financial distress. This trend has continued into the new millennium, with numerous examples of airlines across the globe entering bankruptcy protection or liquidating. The text provides an introduction to both the basics of finance and the particular intricacies of airline finance where there can be significant fluctuations in both revenues and costs. This new edition also includes: capital budgeting management of current assets financial risk analysis fuel hedging aircraft leasing This textbook contains chapters that cover unique aspects of the aviation financial decision-making process. These include a rigorous and structured presentation of the buy versus lease decision that is prevalent in the industry, a valuation process for aviation assets, the
