trees. We couldn't live without plants. We need them for food, shelter, even the air we breathe, yet we know surprisingly little about them. Why do thistles bristle with spines? How do some plants trap and eat insects? Did you know there are trees more than 5,000 years old? *Trees, Leaves, Flowers & Seeds* explores the mysterious world of plants to find the answers to these and many more questions. Each type of plant - such as a flowering plant, a tree, a grass, or cactus - is examined close-up, with an example shown from all angles and even in cross-section. Then picture-packed galleries show the wonderful variety of plants on different themes, perhaps the habitat they grow in, a flower family, or the plants that supply us with our staple foods. But the book also takes a fun, more sideways look

at some truly weird and wonderful plants, including trees with fruits like a giant's fingers, orchids that look like monkey faces, seeds that spin like helicopters, and trees that drip poison. So open this fascinating book and find out more about the amazing world of trees, leaves, flowers, and seeds.

Including more than 2,000 recommendations from gardening experts, Encyclopedia of Garden Plants for Every Location includes planting suggestions for over 30 types of sites, from notoriously dry ground by a hedge or fence to cracks in walls or paving, explains how to assess site and soil, and presents a stunning range of plant partners and planting schemes. Produced in association with the Smithsonian Institution, whose Smithsonian's Gardens creates and
