The best-selling Fundamentals of Corporate Finance (FCF) has three basic themes that are the central focus of the book: 1) An emphasis on intuition-the authors separate and explain the principles at work on a common sense, intuitive level before launching into any specifics. 2) A unified valuation approach-net present value (NPV) is treated as the basic concept underlying corporate finance. 3) A managerial focus-the authors emphasize the role of the financial manager as decision maker, and they stress the need for managerial input and judgment. The Tenth Edition continues the tradition of excellence that has earned Fundamentals of Corporate Finance its status as market leader. Every chapter has been updated to provide the most current examples that reflect corporate finance in today's world. The supplements package has been updated and improved, and with the enhanced Connect Finance and Excel Master, student and instructor support has never been stronger. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Essentials of Health Care Finance stands firmly in its place as the leading textbook on healthcare finance. No other text so completely blends the best of current finance theory with the tools needed in day-to-day practice. Useful for all course levels as well as a professional reference, this text offers a comprehensive introduction to the field. The Seventh Edition has been thoroughly revised to reflect the current economic environment in the healthcare industry, with thoughtful descriptions and 'real-world' examples. As the not-for-profit health care sector has increasingly come under attack by legislators seeking new sources of tax revenue, this edition also features a new chapter on assessing community benefits including an examination of the new Schedule H of the IRS 990 form. Ancillary instructor materials for the Seventh Edition have been significantly expanded and updated. PowerPoint lecture slides now include selected examples from the chapters. Electronic versions of many of the charts and tables in the chapters are provided to enable the instructor to re-create and modify existing examples. An expanded set of test questions with detailed answers will be provided for each chapter. New excel spreadsheets for selected chapters will be created to help both the students and the instructors perform a variety of financial analysis tasks with spreadsheet templates. The instructor's manual has been revised to include key learning points, chapter overviews, and guidelines for class discussion.

With the ongoing global economic crisis still taking full effect on today's society, International Corporate Finance 1e brings a fresh approach and perspective on present events. This text focuses on a key player in this financial world: multinational corporations (MNC). By applying general financial concepts and procedures, it explains the conduct of financial management in MNCs. Because most corporations are either directly or indirectly affected by multinational entities and have a global exposure, a study of MNCH financial management has broad applicability. This new text takes a quantitative approach with an emphasis on excel spreadsheets and current examples.
