It provides support on how to revise for exams and prepare for and write assessed pieces. Designed to compliment existing textbooks for the course, the companion provides: - Easy access to the key issues in Financial Accounting - Practice questions and sample answers to help you prepare for exams and assignments - Tips to help you remember key points and earn extra marks - Helpful summaries of the approach taken by the main course textbooks - Guidance on the essential study skills required to pass the course The SAGE Course Companion on Financial Accounting is much more than a revision guide for undergraduates; it is an essential tool that will help readers take their course understanding to new levels and help them achieve success in their undergraduate course.

This updated Ninth Edition of Accounting Theory: Conceptual Issues in a Political and Economic Environment continues to be one of the most relevant and comprehensive texts on accounting theory. Authors Harry I. Wolk, James L. Dodd, John J. Rozycki provide a critical overview of accounting as a whole as well as touch on the financial issues in economic and political contexts, providing readers with an applied understanding of how current United States accounting standards were derived and where we might be headed in the future. Readers will find learning tools such as questions, cases, problems and writing assignments to solidify their understanding of accounting theory and gain new insights into this evolving field.

Students and others who have not previously come into contact with financial accounting need a book that gives a clear exposition of the basic principles of the subject. This title answers their need. The authors make no assumptions about the reader's prior knowledge. Practical exercises at the end of each chapter allow the reader to assess their progress. This 3rd edition has been thoroughly revised to take into account the latest Generally Accepted Accounting Practices. Additional activities have been added to each chapter and an entirely new chapter on the subject of adjustments has been added. An ideal introductory or bridging text for students new to the subject, their lecturers, and for the general acquisition of the basic concepts of financial accounting.

Divided into a selection of questions, exercises, and problems, this workbook will help keep accountants on top of current international economic affairs. The questions are multiple-choice and ensure understanding of a topic before moving onto the exercises and problems. The exercises can be used to develop proficiency in a topic where students are expected to reach the standard of the problems, and the problems are longer and more complex in nature, requiring an in-depth understanding of the topic. Combined, this complete approach provides a full view of the up-to-date requirements of the International Financial Reporting Standards.

Financial accounting is the branch of accounting thought and practice concerned with preparing and providing information for external users of financial statements. This textbook helps students to understand the concepts that underpin the application of accounting theory to solve accounting problems. This international edition includes extracts from financial statements, definitions of key terms and exam examples. Unlike other textbooks, the author provides analysis of why accountants do what they do, and not just how. With such a wealth of accounting models and diagrams intertwined with this analysis, this book guides the reader through all the practicalities and concepts of financial accounting. Additional online questions, exercises and problems provide an opportunity to put this new-found knowledge into practice along the way. This book is an essential guide for students new to accountancy, and an equally useful tool for more experienced students and researchers.

The book has been specifically designed to include all topics covered in first courses in accounting in higher education. In addition, it caters for the curriculum of professional bodies which examine students for entry into business and accounting careers.
