This book is written primarily for the family to help solve the meat problem and to augment the food supply. Producing and preserving meats for family meals are sound practices for farm families and some city folks as well-they make possible a wider variety of meats, which can be of the best quality, at less cost. Meat is an essential part of the American diet. It is also an expensive food. With the costs high, many persons cannot afford to buy the better cuts; others are being forced to restrict the meat portion of the diet to a minimum, or to use ineffectual substitutes. Commercially in the United States, meat means the flesh of cattle, hogs, and sheep, except where used with a qualifying word such as reindeer meat, crab meat, whale meat, and so on. Meat in this book is used in a broader sense, although not quite so general as to comprise anything and everything eaten for nourishment either by man or beast. To be sure, it includes the flesh of domestic animals and large and small game animals as well; also poultry, domestic fowl raised for their meat and eggs, and game birds, all wild upland birds, shore birds, and waterfowl; and fish.

This IBM® Redbooks® publication presents a general introduction to the latest (current) IBM tape and tape library technologies. Featured tape technologies include the IBM LTO Ultrium and Enterprise 3592 tape drives, and their implementation in IBM tape libraries. This 17th edition includes information about the latest TS4300 Ultrium tape library, TS1155 Enterprise tape drive, and the IBM Linear Tape-Open (LTO) Ultrium 8 tape drive, along with technical information about each IBM tape product for open systems. It includes generalized sections about Small Computer System Interface (SCSI) and Fibre Channel connections, and multipath architecture configurations. This book also covers tools and techniques for library management. It is intended for anyone who wants to understand more about IBM tape products and their implementation. It is suitable for IBM clients, IBM Business Partners, IBM specialist sales representatives, and technical specialists. If you do not have a background in computer tape storage products, you might need to read other sources of information. In the interest of being concise, topics that are generally understood are not covered in detail.

The landing of the American forces on Leyte on 20 October 1944 brought to fruition the long-cherished desire of General Douglas MacArthur to return to the Philippine Islands and avenge the humiliating reverses suffered in the

early days of World War II. The successful conclusion of the campaign separated the Japanese-held Philippine Archipelago into two parts, with a strong American force between them. More important, it completed the severance of the Japanese mainland from the stolen southern empire in the Netherlands Indies from which oil, the lifeblood of modern warfare, had come. The Leyte Campaign, like other campaigns in the Pacific, was waged on the land, in the air, and on and under the sea. In this operation all branches of the American armed forces played significant roles. Therefore, although the emphasis in this volume is placed upon the deeds of the United States Army ground soldier, the endeavors of the aviator, the sailor, the marine and the Filipino guerrilla have been integrated as far as possible into the story in order to make the campaign understandable in its entirety. At the same time, every effort has been made to give the Japanese side of the story.

This book is neither autobiography nor a family history. It is a short account of an unusual childhood and the experience of being born into a family living in a repressive political system. The family members faced many restrictions in their daily lives but, in other respects, managed to avoid the worst excesses of the Communist regime. The book recounts how, despite many limitations, the author and her brother were protected, encouraged to flourish and were not held back by a hostile political environment until their adult years. The book recalls the high and low points of life behind the Iron Curtain in one of the least politically conformist countries of the Soviet controlled Eastern Europe. The work records how dramatically life had changed in a previously cut-off society which, nevertheless, had always held high hopes for future progress.
