A brave, counterintuitive proposal for freeing our children from the shackles of the curiosity-killing institution we call school, Free to Learn suggests that it's time to stop asking what's wrong with our children, and start asking what's wrong with the system.

"Peter Gray...forces us all to rethink our convictions on how schools should be designed to accommodate the ways that children learn." --Steven Pinker in Free to Learn, developmental psychologist Peter Gray argues that in order to foster children who will thrive in today's constantly changing world, we must entrust them to steer their own learning and development. Drawing on evidence from anthropology, psychology, and history, he demonstrates that free play is the primary means by which children learn to control their lives, solve problems, get along with peers, and become emotionally resilient. A brave, counterintuitive proposal for freeing our children from the shackles of the curiosity-killing institution we call school, Free to Learn suggests that it's time to stop asking what's wrong with our children, and start asking what's wrong with the system. It shows how we can act-both as parents and as members of society-to improve children's lives and to promote their happiness and learning.

In his most visionary book, internationally renowned educator Marc Prensky presents a compelling alternative to how and what we teach our children. Drawing on emerging world trends, he elaborates a comprehensive vision for K-12 education that includes new goals, new means, a new curriculum, a new kind of teaching, and a new use of technology. "Marc Prensky—one of the smartest people working in educational reform today—offers us a lucid, inspiring, optimistic, doable, and crucial blueprint for how we can build a future with the schools' children desperately need in our modern, high-risk, highly complex, fast-changing, and imperiled world." —James Paul Gee, Mary Lou Fulton Presidential Professor of Literacy Studies, Regents' Professor, Arizona State University "Marc Prensky was always ahead of his time. Education to better their world continues this trend in spades. This book is a goldmine and a powerful wakeup call that the future is already here—in pockets right now but a harbinger of what is rapidly emerging. Read the book and make yourself part of the future today. As we are finding in our own work, students are agents of change—in pedagogy, in learning environments, and of society itself. Exciting possibilities await!" —Michael Fullan, Professor Emeritus, OISE/University of Toronto "Marc Prensky's answer to the question 'What is the purpose of education?'—that education should now empower youth to improve their communities and the world—would unleash the energy, creativity, and compassion of students and teachers in ways we have never imagined. We need the better world Prensky envisions and we need it now." —Milton Chen, The George Lucas Educational Foundation "Prensky offers perhaps the most compelling case and model yet articulated by anyone for today's globally-empowered children. A must-read book for all educators and anyone who cares about education." —James Tracey, Head of School, Rocky Hill School, RI "Wow. As a takeaway it is good—very good." —John Seeley Brown "A great book. Filled with 'food for thought', common sense, provocative ideas and fun to read." —Nieves Segovia, Presidenta, Institucion Educativa SEK (SEK International Schools)

Unleash powerful teaching and the science of learning in your classroom **Powerful Teaching: Unleash the Science of Learning** empowers educators to harness rigorous research on how students learn and unleash it in their classrooms. In this book, cognitive scientist Pooja K. Agarwal, Ph.D., and veteran K-12 teacher Patrice M. Bain, Ed.S., decipher cognitive science research and illustrate ways to successfully apply the science of learning in classrooms settings. This practical resource is filled with evidence-based strategies that are easily implemented in less than a minute—without additional prepping, grading, or funding! Research demonstrates that these powerful strategies raise student achievement by a letter grade or more; boost learning for diverse students, grade levels, and subject areas; and enhance students' higher order learning and transfer of knowledge beyond the classroom. Drawing on a fifteen-year scientist-teacher collaboration, more than 100 years of research on learning, and rich experiences from educators in K-12 and higher education, the authors present highly accessible step-by-step guidance on how to transform teaching with four essential strategies: Retrieval practice, spacing, interleaving, and feedback-driven metacognition. **With Powerful Teaching, you will: Develop a deep understanding of powerful teaching strategies based on the science of learning Gain insight from real-world examples of how evidence-based strategies are being implemented in a variety of academic settings Think critically about your current teaching practices from a research-based perspective Develop tools to share the science of learning with students and parents, ensuring success inside and outside the classroom Powerful Teaching: Unleash the Science of Learning is an indispensable resource for educators who want to take their instruction to the next level.** Equipped with scientific knowledge and evidence-based tools, turn your teaching into powerful teaching and unleash student learning in your classroom.

All too often, key education initiatives collapse because leaders fail to anticipate and learn from the concerns of those charged with implementation. This illuminating book shows how education leaders can bring opposing groups to common ground, resulting in a solid plan built on diverse wisdom. Acclaimed education coach Jane Kise demonstrates how polarity thinking-a powerful tool for bridging differences developed by Barry Johnson of Polarity Partnerships-provides an alternative to endless debates and either/or thinking. Rather than seeing conflicting forces, the tools help us view them as equally important-even interdependent-concepts, approaches, or models. Readers will find: Ways to recognize polarities, map the positive and negative aspects, and channel energy wasted on disagreement toward a greater common purpose Tools for introducing and working with polarities Polarity mapping to help leaders improve processes for leading change and creating buy-in Ways to use polarity with students as a framework for higher-level thinking

Featuring updated research, grade-specific individual and group activities, and suggestions for assessment, this resource outlines how teachers can inspire their students to become self-motivated learners.

It's within the power of each and every school to unleash the best in teachers, day by day, month by month, year by year. This practical handbook takes the guesswork out of professional learning, showing school leaders how they can build a self-improving culture and remove barriers to learning. David Weston and Bridget Clay set out their advice for how every school can bring in the best ideas from the whole system, and make sure that these have a lasting effect in the classroom. Packed full of examples, easy-to-use ideas and checklists, Unleashing Great Teaching brings together a vast body of experience gained by the Teacher Development Trust (UK), and shows how other schools can learn from these insights. From fostering a culture of evaluating impact to establishing good relationships, communication and a developmental culture, this book takes each and every aspect of the school system and reassesses its role as a driver of teacher and student success. An invaluable resource for leaders at any level within the schooling system, Unleashing Great Teaching will open doors and inspire leaders, teachers, students and communities to learn about learning.

Why is it that we trust Jesus with our salvation but never fully trust him with our lives? God longs to unleash his full measure of power in our lives to fill us with passion and purpose. But too often the things of our past—fear, anger, bitterness, worry and doubt—hold us back. Rather than focusing on the reality of who Christ is and what he has done for us, we allow ourselves to be identified by all the things we aren't. But we are not who our past says we are, and we are not who the enemy says we are. We are who God and his Word say that we are. Pastor Perry Noble challenges all followers of Christ to make a bold move by fully embracing the exciting adventure God has called us to. Are you ready to unleash all the life he has created you to live? Join Perry on this journey as he digs into the major barriers holding people back and shows how Jesus calls and equips his followers to experience a life most of us never dreamed possible.

In a fast paced life we are living in right now, we often forget to give ourselves apt time. In a lifestyle hugely driven by rush, it's quite normal to see people break down slowly. What goes missing? A mentor and a guide who would listen to your problems and help you solve them. We keep looking for that guide in the form of motivational articles, books or speeches and sooner or later it fizzes out. This is where we need to change. We need to understand that we all are a source of infinite potential and there is nothing you should seek outside of yourself to guide you. This book aims to do the same to help you grow inside out. This compilation of various motivational chapters gives a new meaning to various life lessons and how you should deal with it.
