In the spring of 1941, having abandoned his plans to invade Great Britain, Hitler turned the might of his military forces on to Stalin's Soviet Russia. The German army quickly advanced far into Russian territory as the Soviet forces suffered defeat after defeat. With brutality and savagery displayed on both sides, the Eastern front was a campaign in which no quarter was given. Although Hitler's decision to launch 'Barbarossa' was one of the crucial turning points of the war, at first the early successes of the German army pointed to the continuing triumph of the Nazi state. As time wore on, however, the Eastern front became a byword for death for the Germans. In War Without Garlands, Robert Kershaw examines the campaign largely through the eyes of the German forces who were sent to fight and die for Hitler's grandiose plans. He draws on German war diaries, post-combat reports and secret SS files. This original material, much of which has never before been published in English, sheds new light on operation 'Barbarossa', including the extent to which the German soldiers were genuinely surprised at the decision to attack Russia, given the well-publicised non-aggression pact. [Barbarossa] was a brutal, ideologically driven campaign which decided the outcome of World War II. This seminal account will be required reading for all historians of World War II and all those interested in the course of the war.

strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

Have you ever been so lost in your mind that even thinking felt like an impossible task? You just want to lay down right here, day after day after day. Your actions become just a repetition of movement and you are simply going through the motion. Somehow you manage to do everything that is expected from you, but deep inside you have just become numb, numb to the pain, numb to the hurt, numb to life.

all. With a plum job on TV and a great family, his future looked bright. But behind the happy facade, Matt was barely coping, driving himself into the ground with work and withdrawing from everyone but his family. One day something snapped. After admitting in a social media post that he was struggling with depression, Matt was shocked at the outpouring of public support. It would be the catalyst for him to face up to his unhappiness and change his life. Growing up in Otago, Matt was the sensitive youngest child in a family of four boys, with a difficult home life in which high standards were paramount. After trying his first drink at fourteen, Matt found himself in a decades-long spiral of aimlessness and heavy drinking - despite the physical and mental toll the booze took on him. It would take Matt until his thirties to find success as a journalist, always doubting himself and his abilities. After finally giving up drinking at 34, his career went from strength to strength, but the unrelenting pressure of having to perform and his own perfectionist tendencies came at a high cost and he was diagnosed with depression. Something had to give. Matt and his wife made a choice to leave Auckland and his job, moving to Central Otago with their two young boys to build their own home and enjoy a simpler life. Imposter reveals the hard-won wisdom Matt has learnt along the way. Poignant and inspiring, this is a helpful book for anyone who is battling their demons.
