It is, perhaps, the perfect video game. Simple yet addictive, Tetris delivers an irresistible, unending puzzle that has players hooked. Play it long enough and you'll see those brightly colored geometric shapes everywhere. You'll see them in your dreams. Alexey Pajitnov had big ideas about games. In 1984, he created Tetris in his spare time while developing software for the Soviet government. Once Tetris emerged from behind the Iron Curtain, it was an instant hit. Nintendo, Atari, Sega—game developers big and small all wanted Tetris. A bidding war was sparked, followed by clandestine trips to Moscow, backroom deals, innumerable miscommunications, and outright theft. In this graphic novel, New York Times–bestselling author Box Brown untangles this complex history and delves deep into the role games play in art, culture, and commerce. For the first time and in unparalleled detail, *Tetris: The Games People Play* tells the true story of the world's most popular video game.

and the world. Smash your way through and out the door. Be a kid again and fly wild and free. Explore and expand what you can think, feel and become. Every child is an artist. The problem is how to remain an artist once we grow up. Pablo Picasso Yes, sometimes you do and say things you regret, like impolitely telling your Adult and Parent to shut up. Sometimes you go back to sleep and forget to be aware. Sometimes you and the world are not fair. But, because you try hard to be honest and aware. Because you try hard to see yourself and Reality as clearly as you can. Way down deep, beyond the roles and the games and the scripts, you are OK. So say hello to Ayn Rand, and Get out that door.

As a psychiatrist, Dr. Berne found that each person, in early childhood--under the powerful influence of his parents--writes his own script that will determine the general course of his life. That script dictates what kind of person he will marry, how many children he will have, even what kind of bed he will die in. Most of all, it determines whether he will be a winner or a loser, a spendthrift or a skinflint, a tower of strength or a doomed alcoholic. Some people, says Berne, have scripts that call for them to fail in their professions, or to be repeatedly disappointed in love, or to be chronic invalids. Here, he demonstrates how each life script gets written, how it works, and how each of us can break free of it to help us attain real autonomy and true fulfillment.

Transactional Analysis delineates three observable ego-states (Parent, Adult, and Child) as the

basis for the content and quality of interpersonal communication. "Happy childhood" notwithstanding, says Harris, most of us are living out the Not ok feelings of a defenseless child, dependent on ok others (parents) for stroking and caring. At some stage early in our lives we adopt a "position" about ourselves and others that determines how we feel about everything we do. And for a huge portion of the population, that position is "I'm Not OK -- You're OK." This negative "life position," shared by successful and unsuccessful people alike, contaminates our rational Adult capabilities, leaving us vulnerable to inappropriate emotional reactions of our Child and uncritically learned behavior programmed into our Parent. By exploring the structure of our personalities and understanding old decisions, Harris believes we can find the freedom to change our lives.
